Ladies and Gentlemen:

We are responsible for the identification of, and compliance with, all aspects of laws, regulations, contracts, or grant agreements that could have a material effect on the operations of the University of Illinois (University). We are responsible for and we have established and maintained an effective system of, internal controls over compliance requirements. We have performed an evaluation of the University's compliance with the following assertions during the two-year period ended June 30, 2010. Based on this evaluation, we assert that during the years ended June 30, 2010 and June 30, 2009, the University has materially complied with the assertions below.

- A. The University has obligated, expended, received and used public funds of the State in accordance with the purpose for which such funds have been appropriated or otherwise authorized by law.
- B. The University has obligated, expended, received and used public funds of the State in accordance with any limitations, restrictions, conditions or mandatory directions imposed by law upon such obligation, expenditure, receipt or use.
 - C. The University has complied, in all material respects, with applicable laws and regulations, including the State uniform accounting system, in its financial and fiscal operations.
 - D. State revenues and receipts collected by the University are in accordance with applicable laws and regulations and the accounting and recordkeeping of such revenues and receipts is fair, accurate and in accordance with law.
 - E. Money or negotiable securities or similar assets handled by the University on behalf of the State or held in trust by the University have been properly and legally administered, and the accounting and recordkeeping relating thereto is proper, accurate and in accordance with law.

Yours very truly,

Michael J. Hog

Compliance Report Summary Year ended June 30, 2010

The compliance testing performed during this examination was conducted in accordance with *Government Auditing Standards* and in accordance with the Illinois State Auditing Act.

Accountant's Report

The Independent Accountant's Report on State Compliance and on Internal Control over Compliance for State Compliance Purposes does not contain scope limitations, disclaimers, or other significant nonstandard language.

Summary of Findings

Number of	Current report	Prior report
Findings	43	47
Repeated findings	29	7
Prior recommendations implemented or not repeated	18	5

Details of findings are presented in the separately tabbed report section of this report.

Schedule of Findings and Questioned Costs

Findings (Governmental Auditing Standards)

Finding No.	Page No.	Description	Finding Type
10-01	21	Inadequate Controls over User Access to Information Systems	Material weakness
10-02	23	Inadequate Controls over University Procurement Card Transactions	Significant deficiency
10-03	26	Inadequate Year End Accounts Payable Process	Significant deficiency

Compliance Report Summary
Year ended June 30, 2010

Findings (Federal Compliance)

Finding No.	Page No.	Description	Finding Type
10-04	28	Inadequate Documentation for Payroll and Fringe Benefit Expenditures	Material noncompliance and material weakness
10-05	31	Inadequate Documentation for Payroll and Fringe Benefit Expenditures	Material noncompliance and material weakness
10-06	35	Incompatible Allocation Methodologies for Payroll Costs	Material noncompliance and material weakness
10-07	37	Inadequate Procedures to Determine the Allowability of Cost Share Expenditures	Material noncompliance and material weakness
10-08	40	Unsupported Volunteer Rate Used for Cost Share Requirement	Material noncompliance and material weakness
10-09	43	Inadequate Process for Monitoring SNAP Cost Share	Material noncompliance and material weakness
10-10	45	Inadequate Documentation for Institutional Letter of Credit Cash Draws	Scope limitation and material weakness
10-11	47	Inadequate Procedures for Closing Federal Projects	Noncompliance and material weakness
10-12	52	Inadequate Supporting Documentation for Cost Transfers	Noncompliance and material weakness
10-13	56	Incomplete and Inaccurate Annual Effort Certifications	Noncompliance and material weakness

Compliance Report Summary
Year ended June 30, 2010

Findings (Federal Compliance, continued)

Finding No.	Page No.	Description	Finding Type
10-14	61	Incomplete Semi-Annual Expenditure Confirmations	Noncompliance and material weakness
10-15	66	Improper Reporting of Amounts in Financial Status Reports	Noncompliance and material weakness
10-16	69	Inaccurate ARRA 1512 Reports	Noncompliance and significant deficiency
10-17	72	Inaccurate Amounts Reported in Quarterly Federal Financial Reports	Noncompliance and material weakness
10-18	74	Expenditures Reported in the Incorrect Accounting Period	Noncompliance and material weakness
10-19	76	Inadequate Documentation to Support Key Personnel	Noncompliance and material weakness
10-20	80	Failure to Obtain Suspension and Debarment Certifications from Vendors	Noncompliance and material weakness
10-21	84	Failure to Properly Perform Interest Calculations on Federal Advances	Noncompliance and material weakness
10-22	87	Failure to Notify Subrecipients of Federal Funding and Communicate ARRA Information	Noncompliance and material weakness
10-23	90	Inadequate Monitoring of Subrecipient OMB Circular A-133 Audit Reports	Noncompliance and material weakness
10-24	93	Unallowable Costs Charged to Federal Program	Noncompliance and material weakness

Compliance Report Summary
Year ended June 30, 2010

Findings (Federal Compliance, continued)

Finding No.	Page No.	Description	Finding Type
10-25	96	Inaccurate Quarterly Expenditure Reports Prepared for the SNAP Program	Noncompliance and significant deficiency

Exit Conference

The federal compliance findings and recommendations appearing in this report were discussed with University personnel at an exit conference on March 10, 2011. Attending were Walter Knorr, Douglas Beckmann, Maxine Sandretto, Heather Haberaecker, Ginger Velazquez, Sandra Moulton, Vanessa Peoples, Ruth Boardman, and Julie Zemaitis from the University of Illinois; Debbie Rafi from the United States Office of Naval Research; Thomas Kizziah from the Office of the Auditor General; and Catherine Baumann, Jacqueline Dippel, and Jonas Melton from KPMG LLP. Responses to the recommendations were provided by Ruth Boardman in correspondence dated March 15, 2011.

The exit conference to discuss state compliance findings and recommendations was waived by the University in correspondence dated February 21, 2011.

KPMG LLP 303 East Wacker Drive Chicago, IL 60601-5212

Independent Accountants' Report on State Compliance and on Internal Control over Compliance for State Compliance Purposes

The Honorable William G. Holland Auditor General of the State of Illinois

and

The Board of Trustees University of Illinois:

Compliance

As Special Assistant Auditors for the Auditor General, we have examined the University of Illinois' compliance with the requirements listed below, as more fully described in the Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide) as adopted by the Auditor General, during the year ended June 30, 2010. The management of the University of Illinois (the University) is responsible for compliance with these requirements. Our responsibility is to express an opinion on the University's compliance based on our examination.

- A. The University has obligated, expended, received, and used public funds of the State in accordance with the purpose for which such funds have been appropriated or otherwise authorized by law.
- B. The University has obligated, expended, received, and used public funds of the State in accordance with any limitations, restrictions, conditions or mandatory directions imposed by law upon such obligation, expenditure, receipt or use.
- C. The University has complied, in all material respects, with applicable laws and regulations, including the State uniform accounting system, in its financial and fiscal operations.
- D. State revenues and receipts collected by the University are in accordance with applicable laws and regulations and the accounting and recordkeeping of such revenues and receipts is fair, accurate and in accordance with law.
- E. Money or negotiable securities or similar assets handled by the University on behalf of the State or held in trust by the University have been properly and legally administered and the accounting and recordkeeping relating thereto is proper, accurate, and in accordance with law.

We conducted our examination in accordance with attestation standards established by the American Institute of Certified Public Accountants; the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States; the Illinois State Auditing Act (Act); and the Audit Guide as adopted by the Auditor General pursuant to the Act; and, accordingly, included examining, on a test basis, evidence about the University's compliance with those requirements listed in the first paragraph of this report and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on the University's compliance with specified requirements.

In our opinion, the University of Illinois complied, in all material respects, with the compliance requirements listed in the first paragraph of this report during the year ended June 30, 2010. However, the results of our procedures disclosed instances of noncompliance, which are required to be reported in accordance with criteria established by the Audit Guide, issued by the Illinois Office of the Auditor General and which are described in the accompanying schedule of findings and questioned costs as findings 10-35 through 10-43. As required by the Audit Guide, immaterial findings relating to instances of noncompliance excluded from this report have been reported in a separate letter to your office.

Internal Control

The management of the University is responsible for establishing and maintaining effective internal control over compliance with the requirements listed in the first paragraph of this report. In planning and performing our examination, we considered the University's internal control over compliance with the requirements listed in the first paragraph of this report as a basis for designing our examination procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with the Audit Guide issued by the Illinois Office of the Auditor General, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the University's internal control over compliance.

A deficiency in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct noncompliance with the requirements listed in the first paragraph of this report on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material noncompliance with a requirement listed in the first paragraph of this report will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consier to be material weaknesses, as defined above. However, we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies as described in the accompanying schedule of findings and questioned costs as items 10-35 through 10-39. A significant deficiency in internal control over compliance is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Additionally, the results of our procedures disclosed other matters involving internal control over compliance, which are required to be reported in accordance with criteria established by the Audit Guide issued by the Illinois Office of the Auditor General and which are described in the accompanying schedule

of findings and questioned costs as items 10-40 through 10-43. As required by the Audit Guide, immaterial findings relating to internal control deficiencies excluded from this report have been reported in a separate letter to your office.

The University's responses to the findings identified in our examination are described in the accompanying schedule of findings and questioned costs. We did not examine the University's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the Illinois Auditor General, the Illinois General Assembly, the Illinois Legislative Audit Commission, the Governor of the State of Illinois, University management, the Board of Trustees of the University, others within the University, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

KPMG LLP 303 East Wacker Drive Chicago, IL 60601-5212

Independent Auditors' Report on Compliance with Requirements Applicable to Each Major Program, on Internal Control over Compliance, and on the Schedule of Expenditures of Federal Awards in Accordance with OMB Circular A-133

The Honorable William G. Holland Auditor General of the State of Illinois

and

The Board of Trustees University of Illinois:

Compliance

We have audited the compliance of the University of Illinois (the University) with the types of compliance requirements described in the US Office of Management and Budget (OMB) *Circular A-133 Compliance Supplement* (the Compliance Supplement) that could have a direct and material effect on each of the University's major federal programs for the year ended June 30, 2010, except the requirements discussed in the second paragraph of this report. The University's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the University's management. Our responsibility is to express an opinion on the University's compliance based on our audit.

The schedule of expenditures of federal awards and our audit described below does not include expenditures of federal awards for those agencies determined to be component units of the University of Illinois for financial statement purposes.

We did not audit the University's compliance with the requirements governing the repayments special test and provision compliance requirement in accordance with the requirements of the Student Financial Assistance Cluster: Federal Perkins Loan program as described in the Compliance Supplement. Those requirements govern functions performed by Affiliated Computer Services, Inc. (ACS). Since we did not apply auditing procedures to satisfy ourselves as to compliance with those requirements, the scope of work was not sufficient to enable us to express, and we do not express, an opinion on compliance with those requirements. ACS' compliance with the requirements governing the functions that it performs for the University for the year ended June 30, 2010 was examined by the accountants for the servicer in accordance with the U.S. Department of Education's Audit Guide, *Audits of Federal Student Financial Assistance Programs at Participating Institutions and Institution Servicers*. Our report does not include the results of the accountants' examination of ACS' compliance with such requirements.

Except as discussed in the following paragraph, we conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the University's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the University's compliance with those requirements.

Qualifications (Scope Limitation)

As, identified in finding 10-10 in the accompanying schedule of findings and questioned costs, we were unable to obtain sufficient documentation supporting the compliance of the University with the Research and Development Cluster program regarding cash management, nor were we able to satisfy ourselves as to the University's compliance with those requirements by other auditing procedures.

Qualifications (Noncompliance)

As identified below and described in the accompanying schedule of findings and questioned costs, the University did not comply with certain compliance requirements that are applicable to certain of its major federal programs as listed below. Compliance with such requirements is necessary, in our opinion, for the University to comply with requirements applicable to the identified major federal programs.

Federal Program	CFDA No.	Compliance Requirement(s)	Finding Number
Supplemental Nutrition Assistance	10.551/10.561	Allowable Costs/Cost	10-04
Program Cluster	10.551/10.501	Principles and Matching	10 01
Maternal and Child Health Services	93.994	Allowable Costs/Cost	10-04
Block Grant to the States		Principles	
Cooperative Extension Services	10.500	Allowable Costs/Cost	10-05
		Principles and Matching	
Maternal and Child Health Services	93.994	Allowable Costs/Cost	10-06
Block Grant to the States		Principles	
Supplemental Nutrition Assistance	10.551/10.561	Allowable Costs/Cost	10-07
Program Cluster		Principles and Matching	
Supplemental Nutrition Assistance	10.551/10.561	Allowable Costs/Cost	10-08
Program Cluster		Principles and Matching	
Supplemental Nutrition Assistance	10.551/10.561	Allowable Costs/Cost	10-09
Program Cluster		Principles and Matching	

In our opinion, except for the noncompliance described in the preceding paragraph and except for the effects of such noncompliance, if any, as might have been determined had we been able to examine sufficient evidence described in the second preceding paragraph, the University complied, in all material respects, with the requirements referred to above that could have a direct or material effect on each of its major federal programs for the year ended June 30, 2010. The results of our auditing procedures also

16

disclosed other instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying schedule of findings and questioned costs as findings 10-04, 10-05, and 10-11 through 10-32.

Internal Control over Compliance

The management of the University is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the University's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine the auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the University's internal control over compliance.

Requirements governing the repayments special test and provision compliance requirement in the Student Financial Assistance Cluster: Federal Perkins Loan program as described in the Compliance Supplement are performed by ACS. Internal control over compliance related to such functions for the year ended June 30, 2010 was reported on by accountants for the servicer in accordance with the U.S. Department of Education's Audit Guide, *Audits of Federal Student Financial Assistance Programs at Participating Institutions and Institution Servicers*. Our report does not include the results of the accountants' for the servicer testing of ACS' internal control over compliance related to such functions.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the entity's internal control over compliance that might be significant deficiencies or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses and other deficiencies that we consider to be significant deficiencies.

A deficiency in internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected on a timely basis. We consider the deficiencies in internal control over compliance described in the accompanying schedule of findings and questioned costs as items 10-04 through 10-15 and 10-17 through 10-24 to be material weaknesses.

A significant deficiency in internal control over compliance is a deficiency, or combination of deficiencies in internal control over compliance with a type of compliance requirement of a federal program, that is less severe than a material weakness in internal control over compliance yet important enough to merit attention by those charged with governance. We consider the deficiencies in internal control over compliance described in the accompanying schedule of findings and questioned costs as items 10-16 and 10-25 through 10-34 to be significant deficiencies.

Schedule of Expenditures of Federal Awards

We have audited the financial statements of the business-type activities and the aggregate discretely presented component units of the University of Illinois, a component unit of the State of Illinois, as of and for the year ended June 30, 2010, and have issued our report thereon dated December 20, 2010. Our report was modified to include a reference to other auditors. Our audit was performed for the purpose of forming opinions on the financial statements that collectively comprise the University of Illinois' basic financial statements. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

The University's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the University's responses, and accordingly, we express no opinion on the responses.

This report is intended solely for the information and use of the Illinois Auditor General, the Illinois General Assembly, the Illinois Legislative Audit Commission, the Governor of the State of Illinois, University management, the Board of Trustees of the University, others within the University, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

KPMG LLP

March 17, 2011, except for the schedule of expenditures of federal awards as to which the date is December 20, 2010

Schedule of Findings and Questioned Costs
Year ended June 30, 2010

Current Findings – Governmental Auditing Standards

Finding 10-01 – Inadequate Controls over User Access to Information Systems

The University has not established adequate internal controls over access to the information systems used in its financial reporting process.

The University operates an Enterprise Resource Planning (ERP) system to manage the activities of the University. The University functions in a highly distributed operating environment with several thousand users having varying types of system access. Access is granted to users of the University's information systems based on standardized user access profiles. The standardized user profiles are intended to assist the University in limiting access to the information systems based upon the assigned job functions of the specific users to which the profiles are assigned. However, the standardized user profiles currently used by the University are not designed to appropriately segregate conflicting duties and have resulted in an excessive number of users with access rights that were inappropriate based on their roles and job functions. These exceptions identified during our 2009 review consisted of user profiles with inappropriate access to update or change employee pay rates, release financial holds, apply various payments, and override three way matching. These exceptions also identified several user profiles with conflicting user access abilities to create and self approve restricted journal entries as well as update the University's charts of accounts. Lastly, the University did not have procedures to monitor user access through periodic access reviews.

During fiscal year 2010, the University began designing a process to review transactions assigned to standardized user profiles, train unit security contacts, and perform an annual access review for the ERP system. Although the Administration Information Technology Services (AITS) has designed and initiated an annual access review process, this review was not completed during fiscal year 2010 for all departments. In addition to the internal control deficiencies regarding inappropriate access to update or change employee pay rates, as well as users with conflicting access abilities to create and self approve restricted journal entries, during the current year we noted numerous deficiencies related to user access rights. For example:

- There are 132 users (out of 517 total users reviewed) who had excessive access rights that were not appropriate based upon review of each user's job functions.
- There are 26 terminated users with active accounts that were not removed in a timely manner.

Further, we noted periodic reviews of terminated employees with access to the information systems are not performed consistently and documentation is not retained. In addition, there are no procedures in place to perform a periodic review of user access rights to the purchasing system and no procedures are in place to monitor user access rights for employees who transfer positions and change job functions.

The Fiscal Control and Internal Auditing Act (Illinois Compiled Statutes Chapter 30 Section 10/3001), requires the University to establish and maintain a system, or systems, of internal fiscal and administrative controls, which shall provide assurance that: (1) resources are utilized efficiently, effectively, and in compliance with applicable law; (2) obligations and costs are in compliance with applicable law; (3) funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation; (4) revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and (5) funds held outside the State Treasury are managed, used, and

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Governmental Auditing Standards

obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist. The University's system of internal controls should include procedures to ensure access rights granted to University employees are appropriate and to monitor the appropriateness of access levels on a continuing basis. In addition, generally accepted information technology guidance endorses the development of well-designed and well-managed controls to protect computer systems and data. Effective computer security controls provide for safeguarding, securing, and controlling access to systems, properly segregating incompatible duties, and protecting against misappropriation.

In discussing these conditions with University personnel, they stated that they agreed with the exceptions noted in this finding and that work had been underway since the close of the 2009 audit to address most of the weaknesses identified.

Failure to properly assign and monitor user access rights may result in erroneous or fraudulent transactions being recorded in the general ledger system. Without adequate security over access rights, there is a greater risk that unauthorized changes or additions to the University's financial systems could occur and not be detected in a timely manner. If access rights are not reviewed and updated based on job responsibilities on a regular basis, there is a greater risk that journal entries in unlimited dollar amounts, as well as cash disbursements, can be recorded by unauthorized individuals. (Finding Code 10-01, 09-01, 08-05)

Recommendation

We recommend the University review and modify the standard user profiles to ensure (1) the profiles assigned to users appropriately limit each user's access to the systems to which they require access based upon their assigned job responsibilities, (2) the authorization limits assigned to each user are appropriate, and (3) supervisory reviews of transactions are required as appropriate. The University should also implement formally documented review procedures to ensure the profile assigned to each user is compatible with the user's assigned job function and does not present a segregation of duties conflict prior to granting system access. Additionally, we recommend the University implement procedures to perform formal reviews of user access rights on a periodic basis to ensure that the access rights granted to each user are appropriate based on their job responsibilities and that the planned level of segregation of duties is achieved on a continuing basis.

University Response

Accepted. The University's decentralized operating environment involves several thousand users, in hundreds of departments across the three campuses. These users are engaged in a variety of business and administrative functions necessary to perform the mission of the University. The University does have certain processes in place to limit the ability of users to perform many types of transactions. The University believes that many of these controls have been effective, but does agree that improvement to the user access control environment is needed and will be beneficial.

New policies and related procedures were developed, which became effective February 2010, to require documented annual reviews of standard user profiles and individual user access rights. The implementation of these new policies and procedures began in fiscal year 2010 and continues with full implementation expected to be performed in fiscal year 2011. The University will complete the necessary corrective action to address the recommendation in this finding.

Schedule of Findings and Questioned Costs
Year ended June 30, 2010

Current Findings – Governmental Auditing Standards

Finding 10-02 - Inadequate Controls over University Procurement Card Transactions

The University has not established adequate internal controls over procurement card transactions.

The University operates a procurement card program which allows individuals throughout the University to make smaller purchases (defined as less than \$4,999) on a credit card which is directly reimbursed by the University on a monthly basis. The University's policies require individuals assigned a procurement card to sign an agreement stipulating they will use the card in accordance with University policy. This agreement is also required to be authorized by the individual's supervisor or the department head. The University's policies require transactions incurred on the procurement card to be approved in the University's procurement card system by the individual cardholder and an assigned reviewer. Although the University has established policies and procedures for issuing procurement cards, incurring and paying for expenditures with procurement cards, and reviewing and approving of procurement card transactions, we noted these policies and procedures were not properly designed to prevent erroneous charges from being paid by the University and were not followed consistently by University personnel.

Specifically, we noted the procurement card system is configured to automatically record transactions in the general ledger to pre-assigned accounts (auto-reconciled) if the cardholder and/or assigned reviewer have not approved the respective transactions within seven days. The configuration of the system is inconsistent with the University policy that requires both the cardholder and reviewer to approve all procurement card transactions. During the year ended June 30, 2010, procurement card transactions that were auto-reconciled and procurement card transactions that were reconciled and approved by the same individual totaled \$2,503,511 and \$7,494,829, respectively. The University also has not implemented procedures to identify duplicate charges or to reconcile procurement card transactions with travel reimbursement forms. As a result, erroneous or duplicate charges may be paid and recorded by the University without any further detective controls to identify them. We also identified the following exceptions in our testwork over 40 procurement card transactions (totaling \$451,206):

- Three transactions (totaling \$12,098) were for charges prohibited by the University's procurement card policies.
- Original supporting documentation could not be located for one P-Card transaction (totaling \$3,978).
- One transaction (totaling \$7,700) was paid in three installments, circumventing the card holder's approved single transaction limit of \$4,999.

In addition, the University was unable to locate approved Procurement Card Authorization/Agreement and Application forms for two of 40 cardholders selected for testwork.

The University has approximately 5,170 active procurement cards and the procurement card expenditures paid for the year ended June 30, 2010 totaled \$101,588,000.

The Fiscal Control and Internal Auditing Act (Illinois Compiled Statutes Chapter 30 Section 10/3001), requires the University to establish and maintain a system, or systems, of internal fiscal and administrative controls, which shall provide assurance that: (1) resources are utilized efficiently, effectively, and in compliance with applicable law; (2) obligations and costs are in compliance with applicable law; (3) funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation; (4) revenues,

Schedule of Findings and Questioned Costs
Year ended June 30, 2010

Current Findings – Governmental Auditing Standards

expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and (5) funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist. The University's system of internal controls should include procedures to ensure procurement transactions are appropriately reviewed and approved to avoid erroneous or duplicate transactions from being paid and recorded.

In discussing these conditions with University personnel, they stated that due to the late timing of the fiscal year 2009 audit, ample time did not exist to implement corrective measures before the start of fiscal year 2010, resulting in repeat findings related to auto-reconciling and the ability to produce a copy of the signed agreements for all cardholders. In addition, the University is still in the process of implementing its new Travel and Expense Management System, which will provide controls, in addition to those already in place, to further eliminate the possibility of duplicate transactions with regard to travel reimbursements. The bulleted exceptions noted in this finding are a result of human error; specifically, the failure of certain employees to comply with University policy that is clearly stated and disseminated to all through required training.

Failure to properly review and approve procurement card transactions could result in erroneous or fraudulent transactions being recorded in the general ledger system. (Finding Code 10-02, 09-02, 08-03)

Recommendation

We recommend the University revise its current process to require procurement card transactions be reviewed and approved by the card holder and an independent reviewer prior to recording the transactions in the general ledger. Such process modifications may include eliminating the auto-reconciliation function or establishing another mechanism to allow auto-reconciled transactions to be reviewed and approved prior to being recorded in the specific general ledger accounts. We also recommend the University implement procedures to identify duplicate transactions and to reconcile procurement card transactions to travel reimbursement forms.

University Response

Accepted. On July 9, 2010, the auto-reconcile function was disabled in the P-Card software. Effective that date, all P-Card transactions were required to be reconciled by the Reconciler before they would post to the General Ledger. In addition, early in fiscal year 2011, the Corporate Card Office began the process of collecting a copy of all cardholder agreement forms for all current cardholders from University units and has nearly completed that process. The two cardholders for whom paper authorization forms could not be located are authorized cardholders who were issued cards prior to October 2005. Since this date, to ensure retention of this important documentation, units have been required to fax a copy of all signed authorization forms to the central Corporate Card Office before a card would be issued. In addition, all cardholders in the system as of the fall of 2007 were required to complete online training, testing, and recertification prior to receiving renewal P-cards in February 2008.

The University is currently engaged in the configuration and testing of a travel and expense management system, with implementation to begin February 2011. When fully implemented, all travel-related expenses and employee reimbursable expenses will be captured electronically and routed through an electronic workflow process for

24

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Governmental Auditing Standards

review and settlement. This will enable the University to monitor and review employee settlements with P-Card transactions and eliminate any opportunity for duplicate payments.

The University recognizes that with approximately 5,170 active procurement cards, erroneous charges can and do occur. The University employs careful oversight and review to ensure these errors are minimal, and it takes immediate action when errors are discovered. The University will continue to be proactive in improving controls over the P-Card system and will continue to provide training and review of policies and requirements for all cardholders.

Schedule of Findings and Questioned Costs
Year ended June 30, 2010

Current Findings – Governmental Auditing Standards

Finding 10-03 – Inadequate Year End Accounts Payable Process

The University has not established adequate internal controls over accurately identifying and recording period end accounts payable for financial reporting purposes.

During our audit, we noted the University's year end accounts payable procedures include calculating and recording an estimate of unrecorded liabilities based on the level of cash disbursements subsequent to year-end and historical data of which accounting period similar disbursements subsequent to year end have pertained to. In addition, the University performs reviews over cash disbursements subsequent to year end to track and monitor the actual level of unrecorded liabilities. The actual level of unrecorded liabilities is then compared to the estimate recorded for financial reporting purposes.

During our review of cash disbursements subsequent to year end, we identified seven subsequent disbursements (totaling \$1,212,182) which pertained to fiscal year 2010, but which were not properly identified by the University. Four of these subsequent disbursements (totaling \$1,180,130) were not identified because the University's review of these transactions did not include a review of the shipping documents and any applicable shipping terms.

Generally accepted accounting principles require expenditures to be reported in the period they are incurred. Additionally, the Fiscal Control and Internal Auditing Act (Illinois Compiled Statutes Chapter 30 Section 10/3001), requires the University to establish and maintain a system, or systems, of internal fiscal and administrative controls, which shall provide assurance that: (1) resources are utilized efficiently, effectively, and in compliance with applicable law; (2) obligations and costs are in compliance with applicable law; (3) funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation; (4) revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and (5) funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist. The University's system of internal controls should include procedures to accurately assess whether expenditures are reported in the appropriate period.

In discussing these conditions with University personnel, they stated that the unrecorded accounts payable identified by the auditors largely related to bookstore inventory purchases. The inventory was shipped prior to fiscal year end and was physically received by the University on or after July 1, 2010 (early fiscal 2011). However, the applicable shipping terms were "FOB Shipping Point", meaning the purchase belonged to the University when the product left the vendor. Bookstore staff was not aware purchases involving this situation needed to be treated as University inventory and accrued at fiscal year end.

Failure to accurately analyze cash disbursements subsequent to year end may result in the misstatement of the University's financial position. (Finding Code 10-03, 09-03)

Recommendation

We recommend the University review its current process to assess the completeness of its accounts payable at year end and consider changes necessary to ensure all period end accounts payable are accurately identified and

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Governmental Auditing Standards

recorded. Such procedures should include a determination of when the underlying goods or services were received including a review of shipping documentation and any applicable shipping terms.

University Response

Accepted. The University will take the necessary corrective action to address the recommendation in this finding.

Questioned Costs: Cannot be determined

Finding 10-04 <u>Inadequate Documentation for Payroll and Fringe Benefit Expenditures</u>

The University does not have adequate documentation of payroll and fringe benefit expenditures for certain nonacademic and hourly employees at the Chicago campus.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Bi-weekly time reports are prepared by the Chicago campus for non-academic and hourly personnel. These bi-weekly time reports, which are prepared on both a positive and negative (exception) basis depending on the type of employee, are intended to meet the effort reporting requirements of OMB Circular A-21, *Cost Principles for Higher Education Institutions* (OMB Circular A-21); however, the bi-weekly time reports for certain departments do not include the activities of the employee on the time report as required by OMB Circular A-21.

Specifically, the University uses two different methods for recording and approving time for non-academic and hourly employees. The first method, Web Entry, is designed so that employees directly enter their own total hours worked. Payroll costs are allocated to federal and nonfederal projects (funds) based on the initial appointments (budgeted allocation percentages). For the Web Entry method, a supervisor reviews and approves the time and the respective federal and nonfederal project (fund) allocations. The second method, Department Time, is designed so that time is entered centrally by a designated employee. Similar to the Web Entry method, time is allocated to federal and nonfederal projects (funds) based on the initial appointments (budgeted allocation percentages). For these employees, a supervisor reviews the total time reported by an employee; however, the electronic time reports reviewed do not directly contain the federal and nonfederal project (fund) allocations to substantiate the allocations as required by OMB Circular A-21. The University estimates that approximately half of the departments on the Chicago campus use the Web Entry method and half use the Department Time method.

The non-academic and hourly payroll and estimated fringe benefits costs of the major programs for Chicago campus employees were as follows:

Program Name	Payroll Expenditures	Fringe Benefit Expenditures	Total
Research and Development	\$4,816,227	\$1,471,358	\$6,287,585
SNAP	477,274	145,807	623,081
AIDS	102,076	31,184	133,260
MCH Block Grant	3,966,964	1,211,908	5,178,872

Additionally, associated indirect costs are estimated to be 57 to 58.5% of the payroll and fringe benefit costs, excluding research training grants.

Our audit identified other controls and processes that the University has implemented to mitigate the risk that payroll costs are improperly charged to a federal program. These include required reviews and approvals of the initial appointments of employees (i.e. allocation to federal and nonfederal projects) and monthly reviews by principal investigators (PI's) of labor distribution reports and project ledgers. However, the monthly review by principal investigators is not documented.

OMB Circular A-21, Cost Principles for Higher Education Institutions, establishes principles and standards for determining costs for federal awards carried out through grants, cost reimbursements contracts, and other agreements with higher education institutions. To be allowable under federal awards, costs must meet certain general criteria. Those criteria, among other things, require that the expenditures must be allocable, reasonable, and supported by adequate documentation. OMB Circular A-21 (Section J8) requires that the payroll distribution

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

system will allow confirmation of activity allocable to each sponsored agreement and each of the activity needed to identify F & A costs and the functions to which they are allocable.

Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure payroll expenditures are properly supported in accordance with OMB Circular A-21.

In discussing these conditions with University officials, they stated controls and processes exist for the approval of payroll and fringe benefit expenditures for nonacademic and hourly employees to mitigate the risk of payroll costs being improperly charged to a federal program; e.g. after the fact labor redistributions. Beginning in fiscal year 2011 the Chicago campus will establish documentation to substantiate the after-the-fact attestation of time spent and fund allocation for bi-weekly employees.

Inadequate documentation and lack of required effort certifications may result in the federal funds being expended for unallowable purposes. (Finding Code 10-04, 09-04)

Recommendation:

We recommend the University implement procedures to ensure documentation exists to substantiate the afterthe-fact confirmation of activity allocable to each federal grant by the respective employee, principal investigator, or a responsible official.

University Response:

Accepted. The University will establish procedures to ensure documentation exists to substantiate the after-the-fact approval of time spent and account(s) charged for bi-weekly employees paid with federal funds.

Questioned Costs: Cannot be determined

Finding 10-05 <u>Inadequate Documentation for Payroll and Fringe Benefit Expenditures</u>

The University does not have adequate documentation of payroll and fringe benefit expenditures for employees at the Urbana campus who work on the CES program or the Hatch Grant under the Research and Development Cluster program.

The University does not obtain effort certifications for employees who work on the CES program or the Hatch Grant under the Research and Development Cluster program as required by federal regulations. We reviewed a sample of 40 payroll and fringe benefit expenditures totaling \$126,775 for the CES program noting that the effort of these individuals was charged to multiple activities; however, effort certifications were not obtained. Additionally, we noted effort certifications were not obtained for any of the payroll charges used to meet the cost sharing (matching) requirements of the CES program and Hatch Grant. Total payroll and fringe benefit expenditures charged to the CES program for the fiscal year ended June 30, 2010 were \$3,493,800 and \$2,361,297, respectively. Total payroll and fringe benefit expenditures charged to the Hatch Grant for the fiscal year ended June 30, 2010 were \$3,369,407 and \$161,197, respectively. Total payroll and fringe benefit expenditures used to meet the cost sharing (matching) requirement of the CES program and Hatch Grant for the year ended June 30, 2010 were \$9,993,235 and \$15,180,773, respectively. No indirect costs were charged to the CES program or Hatch Grant.

We did note that bi-weekly time reports are prepared for most employees. However, these bi-weekly time reports, which are prepared on both a positive and negative (exception) basis depending on the type of employee, do not include the activities of the employee as required by OMB Circular A-21.

Our audit identified other controls and processes that the University has implemented to mitigate the risk that payroll costs are improperly charged to a federal program. These include required reviews and approvals of the initial appointments of employees (i.e. allocation to federal and nonfederal projects) and monthly reviews by

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

principal investigators (PI's) of labor distribution reports and project ledgers. However, the monthly review by principal investigators is not documented.

Section K of Chapter 3 of the Administrative Handbook for Cooperative Extension Work (dated May 1994) requires compensation of personal services for individuals working on multiple activities to be documented in accordance with the provisions of OMB Circular A-21, *Cost Principles for Higher Education Institutions* (OMB Circular A-21) which establishes principles and standards for determining costs for federal awards carried out through grants, cost reimbursements contracts, and other agreements with higher education institutions. To be allowable under federal awards, costs must meet certain general criteria. Those criteria, among other things, require that the expenditures must be allocable, reasonable, and supported by adequate documentation. OMB Circular A-21 (Section J.10) requires that the distribution of salaries and wages for professorial and professional personnel be supported by semi-annual or monthly effort certifications under the after the fact activity report method.

OMB Circular A-21, Cost Principles for Higher Education Institutions, establishes principles and standards for determining costs for federal awards carried out through grants, cost reimbursements contracts, and other agreements with higher education institutions. To be allowable under federal awards, costs must meet certain general criteria. Those criteria, among other things, require that the expenditures must be allocable, reasonable, and supported by adequate documentation. OMB Circular A-21 (Section J8) requires that the payroll distribution system will allow confirmation of activity allocable to each sponsored agreement and each of the activity needed to identify F & A costs and the functions to which they are allocable.

Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure payroll expenditures are properly supported in accordance with OMB Circular A-21.

In discussing these conditions with University officials, they stated they believe the University systems provide adequate supporting documentation for payroll and fringe benefit expenditures claimed for federal reimbursement and cost sharing (matching) under the CES and the Hatch Grant within the Research and Development Cluster.

Inadequate documentation and lack of required effort certifications may result in the federal funds being expended for unallowable purposes. (Finding Code 10-05, 09-05)

Recommendation:

We recommend the University implement procedures to ensure documentation exists to substantiate the afterthe-fact confirmation of activity allocable to each federal grant and cost share by the respective employee, principal investigator, or a responsible official.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

University Response:

Not Accepted. This is a repeat finding from FY09. The University has sought guidance using the audit resolution process which is still pending. The University disagrees with the audit firm's assessment that a method of effort certification is not occurring. The University utilizes the Activity Reporting System (ARS) and the Banner Time Reporting System to meet reporting requirements associated with receipt of federal formula funds allocated to the University of Illinois. Use of these systems is consistent with guidance outlined in the Administrative Manual for the Hatch Act (page 10) and the Administrative Handbook for Cooperative Extension Work (pages 3-28, 29).

ARS is a campus-based system for monitoring, validating and reporting activities and effort in primary mission areas including instruction, research and outreach activity. Sources of funds supporting salary, as well as percent effort, are documented in this system. All fund sources and effort are captured and documented, including those from federal formula funds. The system is tied to the Banner HR, Finance and Student modules. Utilizing this system, units review, monitor and validate the accuracy of fund source and mission area effort for all academic and graduate employees holding appointments in the unit. Modifications to appointments and/or salary funding source are captured in this system. Validation by authorized personnel at the unit level with specific knowledge of employee effort occurs annually.

The Banner Time Reporting System captures funding source and hours worked for all employees paid in a non-salaried, biweekly manner. Supervisors and authorized unit personnel certify accuracy when approving work or benefit time reported in this system.

Authority for receipt and appropriate use of federal formula funding in support of research (Hatch) and extension work (Smith-Lever) rests with the Directors of the Agricultural Experiment Station and the Extension Service in accordance with guidelines outlined in the administrative manuals provided by USDA, including both programmatic and financial reporting. Funds are allocated for use and budgeted in units where programmatic activity occurs. Federal formula funds are not received in direct support of a specific project proposal, principal investigator or project period in the same way that funds are awarded to faculty who submit successful proposals to NIH. NSF or other granting agencies, including other grant programs provided by USDA. Programmatic oversight for use of these federal formula funds is achieved through annual reporting to USDA through the Plan of Work. Additionally, the Planning, Reporting and Evaluation System (PRES) brings together several reporting features for Extension professional field staff and hourly program staff that include activity reporting, contact reporting, leave reporting for professional field staff, plan of work impact reporting, and annual selfevaluations. Financial oversight is achieved through the filing of annual financial reports that outline the amount of appropriation expended, and the amount of required match made available to support the research and extension programs at Illinois in any given fiscal year. Financial information from University accounting systems is utilized to document expenditures associated with federal formula funds and also to document the pool of allowable expenditures associated with required matching.

Given the unique nature of the federal formula fund appropriations, we believe the University systems in place provide sufficient documentation to meet the requirements for programmatic and financial reporting as outlined in the administrative manuals associated with these funding streams in addition to Circular A-21 requirements.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Auditors' Comment:

As noted in the finding above, the University does not obtain effort certifications for employees who work on the CES program or the Hatch Grant under the Research and Development Cluster program. Additionally, biweekly time reports do not include the activities of employees. Although we acknowledge there are other controls and processes the University has implemented to mitigate the risk that payroll costs are improperly charged to a federal program, we believe the University is not in compliance with documentation requirements for payroll costs under OMB Circular A-21.

Finding 10-06 Incompatible Allocation Methodologies for Payroll Costs

The University (Chicago campus) did not use an appropriate methodology for allocating payroll and fringe benefit expenditures for academic personnel to the MCH Block Grant program.

The University operates the Division of Specialized Care for Children (DSCC) through which the University provides rehabilitative and medical treatments to State children with special healthcare needs. The DSCC has multiple funding sources, including the Medicaid Cluster program operated by the Illinois Department of Healthcare and Family Services (DHFS) and the MCH Block Grant program operated by the Illinois Department of Human Services (IDHS). In order to identify the expenditures related to each of the funding sources, the University has established separate funds to account for the expenditures of the DSCC. Although these separate funds (accounts) have been established to identify costs for each of the federal and state programs which fund the operations of the DSCC, the University views the expenditures reported in these funds as being interchangeable among each of the funding sources. Accordingly, the payroll and fringe benefit expenditures for each employee of the DSCC are allocated to the activities of the DSCC based upon the funding expected to be available from each funding source, and not based upon the expected effort of each employee for each of the DSCC's activities as required by federal regulations.

In performing our testwork over the payroll and fringe benefit expenditures allocated to the MCH Block Grant Program, we noted the University used two incompatible methodologies for allocating payroll and fringe benefit expenditures to the MCH Block Grant program. First, the University prepared annual effort confirmations for academic personnel assigned to the DSCC which was intended to certify the accuracy of the planned effort allocated for each employee to each fund (account). In addition, the University performed a random moment time study to determine the DSCC costs that are allocable to the Medicaid Cluster program as required under an intergovernmental agreement with DHFS. In performing the random moment time study, the University accumulated all payroll, fringe benefit, and indirect costs applicable to the DSCC from the separate funds (accounts) discussed above into a single cost pool and applied the results of the random moment time study to determine the expenditures allocable to the Medicaid Cluster program. During our testwork, we noted the results of the random moment time study are not used to record payroll, fringe benefit, and indirect costs in the general ledger and only used to determine the cost of selected activities. As a result, it is highly probable that the costs allocated to the MCH Block Grant program using the plan confirmation method were also reported to DHFS under the random moment study for the Medicaid Cluster program.

35

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Payroll and fringe benefits expenditures allocated to the MCH Block Grant for employees following the plan confirmation effort reporting method were approximately \$764,009 during the year ended June 30, 2010.

OMB Circular A-21, Cost Principles for Higher Education Institutions, establishes principles and standards for determining costs for federal awards carried out through grants, cost reimbursements contracts, and other agreements with higher education institutions. To be allowable under federal awards, costs must meet certain general criteria. Those criteria, among other things, require that the expenditures must be allocable, reasonable, and supported by adequate documentation. OMB Circular A-21 (Section J.10) requires that the distribution of salaries and wages must recognize the principle of after-the-fact confirmation or determination so that costs distributed represent actual costs, unless a mutually satisfactory alternative agreement is reached. OMB Circular A-21 (Section D) also requires that costs are not included as a cost or used to meet cost sharing requirements of other federally supported activities of the current or a prior period.

Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure payroll and fringe benefit expenditures are properly supported in accordance with OMB Circular A-21 and are not charged to or used to meet the cost sharing requirement of more than one federal program.

In discussing these conditions with University officials, they stated the program for children with special health care needs is administered in accordance with the guidelines and expectations of the state and federal sponsors. The program is operated as a result of a federal – state partnership to maximize services to the population of children with special health care needs consistent with the objectives of the granting agencies and the requirements for use of funds.

The use of incompatible payroll allocation methodologies could result in the same payroll and fringe benefits being allocated under more than one federal program, which are unallowable costs. (Finding Code 10-06, 09-06)

Recommendation:

We recommend the University work with its federal cognizant agency, DHFS, and IDHS to develop a methodology for documenting and allocating payroll, fringe benefits, and indirect costs of the DSCC in a manner which conforms with federal regulations and which best reflects the actual costs allocable to each of the activities of the DSCC.

University Response:

Accepted. The University and the Division of Specialized Care for Children developed procedures to direct charge expenditures and services related to the federally sponsored MCH Block Grant Program. This approach eliminated the necessity to develop an allocation methodology.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Federal Agency: US Department of Agriculture (USDA)

Program Name: Supplemental Nutrition Assistance Program (SNAP)

CFDA # and Program Expenditures: 10.551/10.561 (\$8,128,913)

Award Numbers: 81X6287000

Questioned Costs: Cannot be determined

Finding 10-07 <u>Inadequate Procedures to Determine the Allowability of Cost Share Expenditures</u>

The University does not have an adequate process in place to determine the allowability of certain expenditures used to meet the cost share (matching) requirement of the SNAP Program.

The University is required to meet a cost share requirement of approximately \$7.5 million relative to the SNAP program administered by the Urbana campus. The expenditures used to meet the SNAP cost share requirement include expenditures for teacher salaries made by public school districts at which nutrition education programs are presented. The value of the expenditures made by the public school districts for teacher's salaries are estimated by the University based upon an hourly rate derived from the average annual expenditure data reported by the public school district to the Illinois State Board of Education (ISBE). Specifically, the University computes hourly rates for each school district based upon average annual wage expenditures reported to ISBE and multiplies the applicable school district's rate times the number of teacher hours documented by the school district and University personnel delivering the program. However, in determining the estimate of the value of the time spent by the teachers in the educational programs, the University does not have sufficient documentation to ensure that teacher salaries being used to meet the SNAP cost share were not funded by other federal programs operated by the school district. We did note the University receives a certification at the beginning of the year from participating school districts stating that teachers participating in the SNAP educational programs will not be charged to federal programs. However, there is no after-the-fact verification to substantiate that participating teacher salaries were not funded by other federal programs. As a result, it is possible that the value of the teacher salaries used to meet the University's cost share requirement under the SNAP program may also have been charged to another federal program or used to meet a cost share requirement of another federal program by the school district which is not allowable under SNAP program regulations.

Teacher salary expenditures used to meet the cost sharing requirement of the SNAP program were \$1,812,524 for the year ended June 30, 2010.

Appendix C section B.3 of the Food Stamp Nutrition Education Plan Guidance dated March 31, 2009 states the recipient's share of program costs may not include funds paid by the Federal government under another assistance agreement unless authorized under that agreement and its laws or any non-Federal funds contributed for another Federally assisted program unless authorized by Federal legislation. Additionally, OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, requires nonfederal entities receiving federal awards establish

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure expenditures used to meet cost share requirements have not been reimbursed under another federal program or used to meet the cost share requirement of another federal program.

In discussing these conditions with University officials, they stated that the University has an adequate process in place for documenting expenditures used to meet the cost share requirement of the SNAP program.

Failure to ensure expenditures used to meet cost share requirements are not used for other federal programs may result in unallowable expenditures being used to meet cost share requirements. (Finding Code 10-07, 09-08)

Recommendation:

We recommend the University implement procedures to verify expenditures used to meet the SNAP cost share requirement have not been reimbursed under another federal program or used to meet the cost share requirement of another federal program. In addition, the University should be using the actual wages for the teachers participating in the educational program

University Response:

Not accepted. This is a repeat finding from FY09. This finding is pending resolution with IDHS.

The University disagrees with the finding and with the facts as stated in the finding. Under this program, the mandatory cost-share is a one-to-one match of direct expenditures, up to the maximum award amount of approximately \$7.5 million.

The UI Extension has procedures to verify that teacher salaries used as in-kind cost share are not directly reimbursed from any other federal source of funds. The UI Extension offices require potential program contributors to submit Form A, Confirmation of Community In-Kind Cost Share Contributions. This form, signed by contributors, states, "I confirm the Source of Funding for these contributions are NOT directly or indirectly from Federal Government or Private monies." The form provided by the school officials certifying the source of funding for the teacher salaries has been accepted by the sponsor as documentation supporting this portion of the required cost-share. The University provided the audit firm a copy of this form with the confirmation language during the FY09 audit; the firm did not request a copy of the documentation in FY10, but the substance of the form has not changed.

Management Reviews of this program are periodically conducted by the IDHS Chief of the Bureau of Homeless Services and Supportive Housing to evaluate the performance, the results of the program, and the ability of the Principal Investigator. The most recent Management Report stated the record of staff time spent, both paid and in-kind, is accurate and consistently maintained. It also stated program costs, expenditures and donations are accurately and consistently documented with appropriate details and any claimed, in-kind match is documented.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Auditors' Comment:

The Form A discussed above is obtained from potential program contributors in advance of the performance of the services (i.e. at the beginning of the program year). There is no after-the-fact verification to substantiate that participating teacher salaries were not funded by other federal programs. As a result, it is possible that the value of the teacher salaries used to meet the University's cost share requirement under the SNAP program may also have been charged to another federal program or used to meet a cost share requirement of another federal program by the school district which is not allowable under SNAP program regulations. Additionally, the University computes hourly rates for each school district based upon average annual wage expenditures reported to ISBE, not the actual salary of the teachers that provided services under the SNAP program. Accordingly, we do not believe there is an adequate process in place to determine the allowability of these expenditures used to meet the cost share (matching) requirement.

Additionally, the grant agreement between IDHS and the University requires the University to provide matching expenditures (cost share) of \$11,587,136 from non-federal sources over the term of the grant, which covers more than the current year. Of this amount, an allocable portion for the current year based on a one-to-one ratio is \$8.1 million.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Federal Agency: US Department of Agriculture (USDA)

Program Name: Supplemental Nutrition Assistance Program (SNAP)

CFDA # and Program Expenditures: 10.551/10.561 (\$8,128,913)

Award Numbers: 81X6287000

Questioned Costs: \$203,595

Finding 10-08 <u>Unsupported Volunteer Rate Used for Cost Share Requirement</u>

The University used an unsupported rate to value services of volunteers used to meet the cost share (matching) requirement of the SNAP Program.

The University is required to meet a cost share requirement of approximately \$7.5 million relative to the SNAP program administered by the Urbana campus. The expenditures used to meet the cost share requirement are funded by several sources, including in-kind contributions from local governmental entities at which nutrition education programs are presented. The in-kind contributions from the local governments include an estimated value for the time spent by volunteers who assist University personnel during the educational programs.

The University has established an estimated hourly rate of \$18.97 and \$20.25 which are used to value the services of the volunteers. Management stated the rate was based on an estimated dollar value of volunteer time published by a not-for-profit organization that was established to serve as a leadership forum for charities, foundations, and corporate giving programs. Management further stated that volunteers were performing specialized tasks including materials translation, food preparation demonstrations, and the delivery of curriculum. However, there was no documentation to substantiate what services each volunteer was performing and how it correlated to the hourly rate of \$18.97 or \$20.25. As there is no documentation on the specific services provided by the volunteers and a clear link to specialized skills and corresponding values, we believe the minimum hourly wage rate of \$7.25 (in effect during fiscal year 2010) should be used to value these services. As a result, the contributed volunteer services could be overstated by as much as \$203,595.

Appendix C section A.4 of the Food Stamp Nutrition Education Plan Guidance dated March 31, 2009 requires volunteer time or services to a public organization to be computed on a reasonable hourly basis in accordance with the duties being performed or based on the Federal minimum hourly wage established by the United States Department of Labor. Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure contributions of volunteer time are estimated in accordance with program requirements.

40

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

In discussing these conditions with University officials, they stated the rate used for volunteer services is adequately documented and that the federal minimum hourly wage rate is not a more appropriate estimate of the value of these services.

Failure to appropriately value volunteer services may result in the University not meeting its cost share requirement. (Finding Code 10-08, 09-09)

Recommendation:

We recommend the University implement procedures to ensure rates established to value volunteer services are consistent with the services being provided by the volunteer.

University Response:

Not Accepted. This is a repeat finding from FY09. It is pending resolution with Illinois Department of Human Services (IDHS).

The University disagrees that the rate used for volunteer services is undocumented and disagrees that the federal minimum hourly wage rate of \$8.00 (in effect during fiscal year 2010) is a more appropriate estimate of the value of these services.

The University used a rate of \$18.97 per hour to value the services of volunteers. This rate is based on the calculated "Dollar Value of a Volunteer Hour" as compiled by Independent Sector, a leadership forum for charities, foundations, and corporate giving programs. Per documentation the University provided in support of this rate, the value of volunteer time is based on the average hourly earnings of all production and nonsupervisory workers on private nonfarm payrolls (as determined by the Bureau of Labor Statistics). The compiling organization takes this figure and increases it by 12 percent to estimate for fringe benefits. The actual value of a volunteer hour is \$20.25 for 2008.

The \$18.97 rate was used to calculate the budgeted amount for in-kind volunteer activities per the FY10 UIUC Illinois Food Stamp Nutrition Education proposal. This budget, including the value of volunteer services calculated using this rate, was approved by USDA and IDHS.

The federal SNAP guidelines do not require that the rate used for costing volunteer activities be specifically approved. Per the federal SNAP guidelines, the value of a volunteer's time should be computed on a reasonable hourly basis in accordance with the duties being performed. The University provided information indicating the volunteers provide highly specialized skills, serving as interpreters in classroom settings to assist Hispanic, Chinese, and Somalian students. Using the minimum wage to cost these services would not properly reflect the true value of these services that are critical to the program.

According to the Financial Accounting Standards Board (FASB), the value of volunteer services can also be used on financial statements – including statements for internal and external purposes, grant proposals, and annual reports – only if a volunteer is performing a specialized skill for a nonprofit. They recommend that the general rule to follow when determining if contributed services meet the FASB criteria for financial forms is to

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

determine whether the organization would have purchased the services if they had not been donated. The volunteers are critical to the mission of the SNAP programs and perform specialized tasks including materials translation, food preparation demonstrations, and the delivery of curriculum, none of which are minimum wage tasks.

A Management Review of this program was conducted by the IDHS Chief of the Bureau of Homeless Services and Supportive Housing who evaluated the performance, the results of the program, and the ability of the Principal Investigator. The Management Report stated the number and type of staff (credentials and skills) are appropriate to achieve program goals and a system of maintaining and monitoring/evaluating staff competency is in place and is assessed for effectiveness. The report stated the University has the appropriate staffing and credentials to conduct program activities, noting that "para-professional" staff is overseen by professional staff and the "staff was very engaging and knowledgeable about nutritional education."

Auditors' Comment:

Although management made a general statement that volunteers performed specialized tasks, there is no documentation to substantiate what services were actually provided, nor is there a clear link to specialized skills and corresponding values for the services provided.

Finding 10-09 <u>Inadequate Process for Monitoring SNAP Cost Share</u>

The University does not have an adequate process in place to ensure expenditures used to meet the cost sharing requirement of the SNAP program are allowable.

The University is required to meet a cost share requirement of approximately \$4.1 million relative to the SNAP program administered by the Chicago campus. The cost share is provided through the University's Chicago Partnership for Health Promotion which is a program aimed at providing high quality nutrition education, health promotion, and disease prevention services through partnerships directed at eligible families in Chicago. The expenditures used to meet the cost share requirement are funded by multiple sources including contributed effort by four University departments and contributed effort, space, and supplies from four municipal partners. The cost share expenditures are reported to the University's Grants and Contracts Office in Chicago on an annual basis by the University departments and on a quarterly basis by the municipal partners.

During our testing, we noted approximately \$1.2 million of the cost share expenditures identified for the federal fiscal year ended September 30, 2009 related to contributed effort by University employees that was not supported by documentation required by the applicable cost circular. Specifically, we noted there were not annual effort certifications on file to document the effort of salaried employees identified by the University to meet the SNAP cost share requirement.

Additionally, we noted the University has not implemented procedures to monitor approximately \$2.9 million of cost share expenditures reported by its municipal partners. The University receives quarterly reports which summarize the cost share expenditures provided by its municipal partners; however, the information reported does not provide the University with sufficient information to determine whether the costs meet allowable cost criteria, including whether the expenditures are adequately supported and documented by the municipal partner.

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, states expenditures claimed as cost share must be verifiable from the recipient's records, allowable under the applicable cost principles, and must not be paid by the Federal Government under another award. Additionally, OMB Circular A-110 requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls

43

Schedule of Findings and Questioned Costs

Current Findings – Federal Compliance

should include procedures to ensure cost share requirements are attained in accordance with program requirements.

In discussing these conditions with University officials, they stated they believed their processes were adequate, but will implement additional procedures to monitor the matching requirement.

Failure to adequately document and monitor cost share expenditures may result in the University using unallowable costs to meet its cost share requirement. (Finding Code 10-09)

Recommendation:

We recommend the University implement procedures to ensure employee effort used to meet cost share requirements are adequately documented in accordance with the applicable cost principles. We also recommend the University implement monitoring procedures to ensure cost share expenditures reported by its municipal partners are allowable.

University Response:

Accepted. UIC will develop procedures to obtain supporting documentation as appropriate for the SNAP cost share.

Finding 10-10 Inadequate Documentation for Institutional Letter of Credit Cash Draws

The University does not have adequate documentation to demonstrate it minimized the time elapsing between the draw (receipt) and expenditure of federal funds for individual awards funded with institutional letters of credit.

The University has established several institutional letters of credit (LOC or LOCs) with federal funding agencies to facilitate cash draws on federally sponsored projects. There are usually numerous individual awards that are drawn from the same LOC. Cash draws for each LOC are calculated weekly by the University's Grants and Contracts Office using a set of queries from the general ledger which summarizes the "claim on cash" (cash basis expenditures less previous cash draws applied) for each grant under the respective LOC and subtracts the aggregate amount of prior draws that have not been applied to the individual awards. Because the calculation for cash draws is performed in total at the LOC level and cash draws are only applied once a month, it is not possible to determine the cash position of an individual grant or whether the University has minimized the time elapsing between the draw down and expenditure of federal funds for each individual grant. Accordingly, we are unable to determine whether the University is in compliance with the cash management regulations.

As part of the finding resolution process, the University has been working with the federal agencies with which it has institutional letters of credit to clarify whether the University is required to document the cash position for individual grants at the time cash draws are performed.

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110), requires the University to minimize the time elapsing between the transfer of funds from the federal government and the payment of program expenditures. OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws,

45

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

regulations, and program compliance requirements. Effective internal controls should include procedures to ensure cash draws are properly calculated and adequately supported at the individual award level.

In discussing these conditions with University officials, they stated that in accordance with the allowable pooled payment process, the calculation for cash draws is performed in total at the letter of credit level and not on a grant-by-grant basis.

Failure to adequately document institutional LOC cash draws may result in excessive federal funds being drawn in advance of program expenditures resulting in an interest liability to the Federal government. (Finding Code 10-10, 09-10)

Recommendation:

We recommend the University apply cash after each draw and document the amount of the cash draw applicable to each individual award.

University Response:

Not Accepted. This is a repeat finding from FY09. The Department of Health and Human Services (HHS) in coordination with the Department of Education and the National Science Foundation, issued on February 14, 2011, a Management Decision Letter (MDL). According to the MDL, "The audit finding is not sustained based on our review."

The University subsequently received a letter on March 10, 2011, from HHS that states "The purpose of this communication is not to reverse our decision(s) but to clarify the nature of the finding and the direction that the University needs to take in correction of the issue(s)". The University will seek further guidance from HHS.

Auditors' Comment:

As noted in the finding above, we were not able to determine the cash position of an individual grant or whether the University had minimized the time elapsing between the draw down and expenditure of federal funds for each individual grant.

Finding 10-11 <u>Inadequate Procedures for Closing Federal Projects</u>

The University does not have adequate procedures in place to ensure federal projects are closed in a timely manner.

The University administers thousands of individual federal projects from several federal agencies and passthrough entities which have varying project periods. The University has formally documented policies and procedures for closing out federally funded projects which generally require projects to be closed within 90 days after the project end date. Procedures have been established to send a notice of terminating accounts to the principal investigator or program coordinator 90 days prior to the project end date. The notice provides information about the process for closing projects and includes an information request for any extensions granted and other project information necessary to complete the project close out. Personnel in the Grants and Contracts

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Office are responsible for ensuring the University has met its obligations under the project, closing the general ledger accounts, and returning any unexpended grant funds to the federal agency or pass-through entity.

During our review of the schedule of expenditures of federal awards for the year ended June 30, 2010, we noted expenditures (or negative expenditures) were reported for several projects with end dates prior to June 30, 2008. Specifically, we noted the following:

		Year ended June 30, 2010				
Year ended	Number of projects with end date during fiscal year	Number of cost transfers	Dollar amount of positive cost transfers	Dollar amount of negative cost transfers		
June 30, 1996	1	2	\$0	\$(6,927)		
June 30, 1998	1	0	0	0		
June 30, 2000	3	0	0	0		
June 30, 2001	2	4	2,273	(1,093)		
June 30, 2002	9	57	97,590	(143,160)		
June 30, 2003	10	6	85,887	(469,338)		
June 30, 2004	15	18	0	(58,704)		
June 30, 2005	19	91	24,048	(84,341)		
June 30, 2006	36	179	26,793	(369,967)		
June 30, 2007	54	263	217,930	(220,173)		
June 30, 2008	96	1,151	544,527	(1,462,025)		
Totals	246	1,771	999,048	(2,815,728)		

Upon review of a sample of 40 transactions recorded in projects with end dates prior to June 30, 2008, we noted the vast majority of the transactions selected were to transfer expenditures to the correct project accounts. The underlying transactions being transferred had been erroneously recorded to an incorrect project several years prior to the date of the transfer. Accordingly, the periodic financial reports previously submitted for several of the University's federally funded projects inaccurately included or excluded project expenditures which were later transferred between projects.

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110) requires accurate, current, and complete disclosure of the financial results of each federally-sponsored project or program in accordance with the applicable reporting criteria. OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure expenditures (including cost transfers) are allowable in accordance with federal regulations.

In discussing these conditions with University officials, they stated there are a variety of reasons for delays in grant close-outs.

49

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Failure to close projects and process necessary cost transfers in a timely manner may result in inaccurate periodic financial reports and disallowances of costs. (Finding Code 10-11, 09-13)

Recommendation:

We recommend the University implement procedures to monitor the timeliness of project close outs. Additionally, the University should review its current processes to identify any additional procedures necessary to reduce the number of late cost transfers being processed upon the close out of its federal projects.

University Response:

UIUC Response

Accepted. However, we disagree with the data in the audit firm's table presented above. The overall total of 246 awards reported as having expenditure activity FY10 is not representative of the true population. Only 136 awards with end dates prior to FY09 had transactions posted in FY10; the audit firm included 103 awards that had no expenditures posted during FY10.

The University notes the testing population for timely closeout included only 136 federally-funded awards (direct and pass-through funding) with project period end dates prior to 7/1/2008 that had transactions posted in FY10 and 103 awards that had no transaction activity in FY10, not the full population of all awards that were closed (termed) on all campuses during FY10 – which was 2,643 awards in total. For all Campuses, the total number of awards active during FY10 was 8,913 of which 5,461 are federally funded.

1,771 individual expenditure transaction entries are noted in the tables above. This is the total number of expenditure transactions posted to the awards; not all of these transactions are cost transfers. 882 of the transactions (~50% of the total) are system-generated assessments for fringe benefits or F&A that automatically post in the accounting system subsequent to the direct expenditure posting. 96 transactions are administrative adjustments posted by the central administrative offices to correct fringe benefit or F&A assessments. Of the remaining 793 transactions, 284 (~36% of the remaining) are adjusting entries with an absolute value of \$100 or less. Many of these entries were necessary bookkeeping adjustments needed to zero out the funds to a status where budget/expenditures/cash collected values are equal. This was required before the awards could be administratively closed out (termed) in the financial accounting system.

Further, the University notes that while the close-out process will apply to all the awards listed within this finding, many of the awards specifically listed in this finding are currently active.

The University acknowledges the grant closeout process can be complicated and delays may occur for a variety of reasons. There are instances of late award close-out. The causes of a late close-out vary depending on the award and the situation. Incremental funding on multi-year awards may be delayed, causing valid and allowable expenditures to post during the wait period. Difficulties in collecting delinquent Accounts Receivable balances or completion of project deliverables have also contributed to delays in the closeout of awards.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

The University believes adequate controls are in place, and the majority of awards are closed in a timely manner. The University will continue to monitor the timeliness of closeouts.

UIC Response

Partially Accepted. We agree that transactions were posted outside the normal timeframe for project closeout as defined by our policies and procedures. There are various causes of late close-outs, and we are working towards improving the timeliness of this process.

We disagree that the procedures are inadequate. The documented procedures clearly define the process and timeline for normal closeouts. In most cases, the financial reports are based on an analysis of applicable and reportable costs through the project end date. Often times, there can be trailing or un-reportable transactions that do not impact the financial reports, therefore, the periodic financial reports are not inaccurate.

Auditors' Comment:

As discussed in the finding above, we noted several transactions posted to awards which ended prior to June 30, 2008. We believe the University should review its current processes to identify additional procedures necessary to monitor the timeliness of project close outs and reduce the number of late cost transfers required at close out.

Questioned Costs: None

Finding 10-12 Inadequate Supporting Documentation for Cost Transfers

The University does not adequately document cost transfers.

The University has formal policies and procedures which outline the documentation required to support cost transfers and a standard form has been developed to assist the University in collecting supporting documentation for each cost transfer. The standard form provides a series of potential reasons that a cost transfer may be required and prompts the preparer to other sections of the form to provide additional supporting documentation as prescribed by University policy. The form is required to be certified by the principal investigator or another responsible official and must be reviewed and approved by the Grants and Contracts Office.

During our testwork over 164 cost transfers recorded during the year ended June 30, 2010, we were initially provided brief journal entry descriptions as the supporting documentation for each of the cost transfers selected. The journal entry descriptions consisted of a few sentences which generally stated an error had occurred in the original entry and that a transfer was required. These descriptions did not provide sufficient information to allow

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

an independent party to understand the reason the cost transfer was required. Upon further investigation and inquiry, the University was able to provide other support which better described the reasons for some of the cost transfers tested. However, the standard cost transfer form was not completed in accordance with University policy for a majority of the transfers tested. Upon further inquiry, we noted these transfers were initiated by the Grants and Contracts Office in closing out projects and that the standard cost transfer forms were not completed for any cost transfers prepared by the Grants and Contracts Office.

OMB Circular A-21, Cost Principles for Higher Education Institutions, establishes principles and standards for determining costs for federal awards carried out through grants, cost reimbursements contracts, and other agreements with higher education institutions. To be allowable under federal awards, costs must meet certain general criteria. Those criteria, among other things, require that the expenditures must be allocable, reasonable, and supported by adequate documentation. OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110) requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure expenditures (including cost transfers) are adequately documented in accordance with federal regulations and University policy.

In discussing these conditions with University officials, they stated cost transfers are adequately documented and supported in accordance with University policy that meets the requirements of OMB Circular A-21 and OMB Circular A-110.

Failure to adequately document cost transfers may result in unallowable costs being charged to federal programs. (Finding Code 10-12, 09-14)

Recommendation:

We recommend the University implement procedures to ensure costs transfers are adequately documented and supported in accordance with University policy.

University Response:

Not Accepted. The University believes cost transfers are adequately documented and supported in accordance with University policy and requirements of OMB Circular A-21 and OMB Circular A-110. The University has formal written policies for cost transfers for every campus. These policies are followed by Grants Office personnel during their review of cost transfers posted to sponsored project funds. However, the University will consider refinements to internal policies to make it clear that certain administrative transactions, especially those moving minor costs off grant accounts during the close out process, do not require supporting documentation.

The University's cost transfer policies address the type of support and documentation that is to be provided by the departments and/or PIs to support cost transfers. In some circumstances, as outlined in the policies, a standard form GC-81 "Cost Transfer Justification for Sponsored Projects" must be completed and filed with the Grants Office. The GC-81 form is an administrative document developed by the Grants Office to obtain

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

additional supporting information from units for cost transfers on Sponsored Projects. The GC-81 form was not designed for, nor is there a requirement for it to be completed for, transfers made by internal Grants Office personnel in the course of making an administrative adjustment or closing out an award. Additionally, this form is not used by Federal Agriculture Appropriations, i.e., Cooperative Extension Service.

The JV text form (FOATEXT) functionality, in the University's Banner system, is used to attach a brief explanation of the cost transfer to the journal voucher document number. The purpose of FOATEXT is to provide Grants Office personnel basic, general information as outlined in the cost transfer policy and to provide a contact point for follow-up and investigative action, if needed. Space in the FOATEXT form is limited to 50 characters per line. Comments provided in the FOATEXT form are not intended to provide an all-encompassing record for independent party review. In addition to reading the brief narrative in the FOATEXT, a review of the grant file and other supporting documentation related to the transfer is often required in order to gain a more complete understanding of the reason for the cost transfer.

Auditors' Comment:

As discussed in the finding above, the nature and reason for the cost transfer was not adequately documented and had to be supplemented through inquiry of University personnel and other documentation generated in response to our questions. We understand University policy to require a specific form to be completed to support cost transfers; however, several of the cost transfers were not supported with the standard cost transfer form. We continue to recommend the University implement procedures to ensure costs transfers are adequately documented and supported in accordance with University policy and federal regulations.

Questioned Costs: Cannot be determined

Finding 10-13 *Incomplete and Inaccurate Annual Effort Certifications*

The University does not have an adequate process to ensure annual effort certifications are accurate and completed in a timely manner.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Payroll and fringe benefit expenditures for academic and salaried personnel at the Chicago campus are required to be supported by annual effort certifications accounting for 100% of the employee's time and effort. Effort certifications are automatically generated by the Effort Reporting System based upon actual payroll charges recorded in the general ledger; however, the effort percentages are manually entered in the system by the individual completing the certification. During our testwork over 67 effort certifications for the Research and Development Cluster program administered by Chicago, we noted the following:

- The effort certification for one employee identified 9% of the employee's effort was used to meet a cost sharing requirement; however, payroll records reflected 100% of the employee's effort was used to meet the cost share requirement. As a result, 91% of the employee's effort (equivalent to \$2,924) used to meet the cost share requirement was not properly identified.
- The effort certification for one employee certified 48% of the employee's effort was charged to a federal award; however, payroll records reflected 100% of the employee's effort was charged to the federal award. As a result, 52% of the employee's effort (equivalent to \$7,840) charged to a federal award was not properly certified.

The University obtained corrected certifications for the individuals identified above after they were identified by our testing.

Additionally, we noted the University does not have adequate procedures in place to ensure effort certifications are completed in a timely manner. Specifically, in our testing of 20 grants and contracts within the Research and Development Cluster program administered by the Chicago campus, we noted the principal investigator for one award had not completed the annual effort certifications for fiscal years 2009 or 2010. Upon further review, we noted as of January 27, 2011, a total of 74 and 55 annual effort certifications had not been completed by employees or their immediate supervisors for the academic years ended August 15, 2009 and 2010, respectively. As a result, the payroll, fringe benefits, and indirect costs charged for these individuals are not adequately supported.

Payroll, fringe benefits, and indirect costs charged to federal programs or used to meet cost share requirements which were not supported by annual effort certifications were as follows:

	Payroll and Fringe Benefit	Fringe Benefit	
Program Name	Expenditures	Expenditures	Total
Research and Development Cluster	\$1,733,799	\$529,676	\$2,263,475

Additionally, associated indirect costs are estimated to be 57% of the payroll and fringe benefit costs, excluding research training grants.

OMB Circular A-21, *Cost Principles for Higher Education Institutions*, establishes principles and standards for determining costs for federal awards carried out through grants, cost reimbursements contracts, and other agreements with higher education institutions. To be allowable under federal awards, costs must meet certain general criteria. Those criteria, among other things, require that the expenditures must be allocable, reasonable,

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

and supported by adequate documentation. OMB Circular A-21 (Section J8) requires that the payroll distribution system will allow confirmation of activity allocable to each sponsored agreement and each of the activity needed to identify F&A costs and the functions to which they are allocable.

Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure payroll expenditures are properly supported in accordance with OMB Circular A-21.

In discussing these conditions with University officials, they stated the effort certification process is adequate.

Inaccurate and incomplete effort certifications result in unallowable costs being charged to the federal programs or used to meet matching requirements. (Finding Code 10-13)

Recommendation:

We recommend the University implement procedures to ensure effort certifications are completed in a timely manner and accurately reflect the individual's actual effort.

University Response:

Not accepted. The University disagrees with the conclusion that it does not have an adequate process to ensure annual effort certifications are accurate and completed in a timely manner. Starting with the Academic Year (AY) 2009 effort certification period, the University completely revamped its effort reporting policies and procedures to ensure that we are compliant with OMB Circular A-110 which requires institutions to establish and maintain internal controls to ensure payroll expenditures are properly supported in accordance with OMB Circular A-21. Key to the internal control process is the University's follow-up and escalation process which involves escalation first to the department head, then to the Dean and ultimately to campus leadership If necessary, for uncertified effort reports. The adequacy of this process is supported by the fact that only one effort report out of 4,450 is unsigned for the AY10 effort reporting cycle. This equates to a 99.98% completion rate and is indicative of the campus' commitment to effort reporting compliance. A slightly higher rate of noncompletion for AY 2009 was a result of the process being new.

A second internal control built into the effort reporting process is an exception report that compares salaries charged to sponsored programs with the effort actually certified for the program. If there are disparities, the effort certification will show up on the exception report. The report is automatically generated by the Effort Reporting System. For the single incorrect effort report identified by the firm, the effort certification appears on the exception report because there is a variance between salary charged and effort certified. The report is not generated until the close of our Effort Reporting cycle. As a result, the certifications appearing on the exception report had not been resolved at the time of our audit.

OMB Circular A-110 requires nonfederal entities receiving federal awards to establish and maintain internal controls designed to *reasonably* ensure compliance with federal laws, regulations and program compliance requirements. The fact that auditor review of AY10 effort reports and payroll distributions showed that no

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

unallowable personnel costs were charged to federal programs attests to both the reasonableness and accuracy of the University's effort reporting process.

The University also disagrees with the conclusion that effort certifications are not completed in a timely manner. No timeline for completion of effort certifications has been specifically defined or required by any federal regulation or standard. Therefore, the University has adopted a timeframe that works for the campus and meets federal requirements. The annual effort certification period includes both the AY10 academic period and the summer period which ends in August, 2010. The campus has elected to open the effort reporting system during the month of October because the summer period ends in mid-August. The August month-end closing occurs in mid-September and time is needed to prepare the data set for the effort reporting system. This allows time to create a payroll dataset that accurately captures hundreds of thousands of payroll transactions, represents hundreds of millions of salary dollars and accurately identifies the approximately 4,500 employees who will need to certify their effort. For the AY10 effort reporting period, only 1 of 4,450 effort reports remained uncertified at the end of the cycle. No federal regulations or standards suggest that this timeframe is untimely. The stated expectation by the firm is unsupported by regulation and unreasonable for the Chicago campus.

The various number of uncertified reports noted in the finding is due to the fact that the effort reporting cycle overlaps with the fiscal year A-133 audit meaning that effort reports are not due until after the auditors are expected to complete their fieldwork. The University typically accelerates requested effort reports so as not to hold up fieldwork. This year the University was asked to provide a list of all certified and under certified effort reports at a point in time during our effort reporting cycle. A total of 55 outstanding reports were provided on 1/27/11. These are the reports that are noted as untimely and thus cited as a finding based on the firm's determination. Explanations for why each of the 55 reports was not certified as of 1/27/2011 were subsequently provided. Only one effort report remains uncertified.

Regarding the two certifications noted as inaccurate, the effort reported as 48% was inaccurate but the underlying payroll charge was correct. The other effort report was certified correctly. The preliminary report provided to the auditor was not yet certified. The federal awards are accurately charged supported by the underlying payroll records and no unallowable costs were charged to these federal programs as cited in the finding.

Auditors' Comment:

OMB Circular A-21 requires the payroll distribution system to allow confirmation of activity allocable to each sponsored agreement and each of the activity needed to identify F&A costs and the functions to which they are allocable. The University uses the annual effort certifications to meet the requirements of OMB Circular A-21. As we noted above, as of January 27, 2011, a total of 74 and 55 annual effort certifications had not been completed by employees or their immediate supervisors for the academic years ended August 15, 2009 and 2010, respectively. Subsequent to our request, the University worked to obtain the incomplete effort certifications for the academic year ended August 31, 2010; however, missing effort certifications were not obtained for the academic year ended August 31, 2009. As a result, these costs are not supported in accordance with OMB Circular A-21.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

We acknowledge federal regulations do not specify a timeframe for completion of these certifications; however, we do not believe it is reasonable for annual effort certifications to be incomplete more than four months after the end of the period being certified.

Questioned Costs: Cannot be determined

Finding 10-14 <u>Incomplete Semi-Annual Expenditure Confirmations</u>

The University does not have an adequate process to ensure all semi-annual expenditure confirmations are certified by principal investigators in a timely manner.

Payroll and fringe benefit expenditures for personnel at the Urbana campus are required to be supported by semiannual expenditure confirmations certified by the principal investigator. Semi-annual expenditure confirmations summarize the salaries and wages and other direct costs recorded in the general ledger for the project.

61

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

During our testwork over 40 semi-annual expenditure confirmations for 20 grants and contracts within the Research and Development cluster at the Urbana campus, we noted the principal investigator on one grant selected had not signed and returned the semi-annual expenditure confirmation for the six month periods ending December 31, 2009 or June 30, 2010. Upon further analysis of all semi-annual confirmations not signed by principal investigators as of December 20, 2010 (for the June 30, 2009 and December 31, 2009) January 18, 2011 (for the June 30, 2010, confirmation period), we noted the following number of semi-annual expenditures confirmations had not been completed for all federal programs administered by the Urbana Campus:

Confirmation Period End Date	Date of Confirmation	Confirmation Due Date	Number Awards Without Signed Confirmations
June 30, 2009	10/16/09	11/30/09	5
December 31, 2009	3/8/10	4/16/10	14
June 30, 2010	10/8/10	11/5/10	29

Payroll and other direct costs (including fringe benefits) not supported by a semi-annual expenditure confirmation of the federal programs were as follows:

	Payroll	Other Direct		
Program Name	Expenditures	Expenditures	Total	
Research and Development Cluster	\$630,930	\$529,633	\$1,160,563	
Other non-major programs	81,299	205,363	286,662	

Additionally, associated indirect costs are estimated to be 58.5% of the payroll and fringe benefit costs, excluding research training grants.

OMB Circular A-21, *Cost Principles for Higher Education Institutions*, establishes principles and standards for determining costs for federal awards carried out through grants, cost reimbursements contracts, and other agreements with higher education institutions. To be allowable under federal awards, costs must meet certain general criteria. Those criteria, among other things, require that the expenditures must be allocable, reasonable, and supported by adequate documentation. OMB Circular A-21 (Section J8) requires that the payroll distribution system will allow confirmation of activity allocable to each sponsored agreement and each of the activity needed to identify F&A costs and the functions to which they are allocable.

Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure all payroll expenditures are properly supported in accordance with OMB Circular A-21.

In discussing these conditions with University officials, they stated the University's semi-annual expenditure confirmation process is adequately designed and operates effectively.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Incomplete semi-annual expenditure confirmations result in unallowable costs being charged to the federal programs or used to meet matching requirements. (Finding Code 10-14)

Recommendation:

We recommend the University implement procedures to ensure all semi-annual expenditure confirmations are completed in a timely manner.

University Response:

Not Accepted. The confirmations provide a consolidated semi-annual after-the-fact review of direct costs charged to sponsored projects and the audit firm's assertion that "incomplete semi-annual expenditure confirmations result in unallowable costs being charged to the federal programs or used to meet matching requirements" is not substantiated.

The current confirmation process and procedures are effective. For the Urbana campus, a total of 13,341 confirmation reports were created and sent out to PIs during the three semi-annual confirmation periods tested by the auditing firm (covering the time frame of January 2009 through June 2010). For these three reporting periods, 13,336 confirmation reports (99.96%) have been signed (confirmed) and returned to GCO. Only 5 of those reports (.04%) from the last 2 reporting periods tested have not yet been signed and returned to GCO. Four of these five outstanding reports are due to one PI who retired from the University without signing the reports.

The table below demonstrates the effectiveness of the confirmation process. Data is given for the three reporting cycles tested by the auditing firm. Prior reporting cycles are similar in volume and are 100% complete with all confirmation reports signed and returned.

OMB Circular A21 section 10.c. 2e states that "after-the-fact" reports will be prepared not less frequently than every 6 months: "For professorial and professional staff, the reports will be prepared each academic term, but no less frequently than every six months." The semi-annual confirmation process is compliant with the requirements of OMB A-21. The timeliness and effectiveness of the process was enhanced with the implementation of an online reporting system as of the June 2010 reporting cycle (migration from paper reporting).

The University's semi-annual confirmation process to ensure that reports are confirmed by the Principal Investigator (PI) or other responsible individual functions well. This is demonstrated by the insignificant number of semi-annual confirmation reports that have not yet been signed as of the date of this response. The information in the auditing firm's table represents a 'snapshot' of information that was taken during an ongoing process. Efforts to have signed reports returned to the Grants and Contracts Office (GCO) do not cease at a given point in time; efforts continue until all reports are returned. The "due dates" referenced in the auditing firm's table are GCO's internal "requested return dates" and are not mandatory due dates governed by time frames imposed by OMB A-21 or other federal regulations.

The semi-annual confirmation process includes steps to follow-up with PIs and responsible Department authorities for reports that are not signed and submitted by the requested return date. These include reminders sent to the PIs, the Department Contacts, and others at specific predetermined intervals.

- The first reminder notice is automatically sent to the PI and Department Contact one day past the requested return date for all reports not yet submitted to GCO.
- Subsequent reminder notices are automatically sent every 14 days (for 3 times), and then every 7 days until the report is submitted.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

• When a report has not been submitted for a predetermined number of days beyond the requested return date, the notification process is escalated to higher campus authorities. Copies of the notices are sent to the Deans, Department Heads, and the Office of the Vice Chancellor for Research.

Auditors' Comment:

OMB Circular A-21 requires the payroll distribution system to allow confirmation of activity allocable to each sponsored agreement and each of the activity needed to identify F&A costs and the functions to which they are allocable. The University uses the semi-annual expenditure confirmations to meet the requirements of OMB Circular A-21. As we noted above, as of December 20, 2010 (for the June 30, 2009 and December 31, 2009) January 18, 2011 (for the June 30, 2010, confirmation period), a total of 5, 14, and 29 semi-annual expenditure confirmations had not been completed by principal investigators for the six month periods ended June 30, 2009, December 31, 2009, and June 30, 2010, respectively. As a result, these costs are not supported in accordance with OMB Circular A-21.

We acknowledge federal regulations do not specify a timeframe for completion of these confirmations; however, we do not believe it is reasonable for semi-annual expenditure confirmations to be incomplete more than six months after the end of the period being certified.

02/S08030/S08064 (10.500)

Questioned Costs: None

Finding 10-15 Improper Reporting of Amounts in Financial Status Reports

The University did not accurately prepare its financial status reports in accordance with the selected basis of accounting.

The University is required to prepare periodic financial status (SF-269) reports (until September 30, 2009) and federal financial (SF-425) reports (effective October 1, 2009) for awards received directly from federal agencies. The SF-269 reports and SF-425 reports, which may be prepared on the cash or accrual basis of accounting,

66

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

include information on program expenditures, unliquidated obligations, and indirect expenses charged to the grant.

During our testwork of seven SF-269 reports and 35 SF-425 reports submitted during fiscal year 2010, we noted the following:

- The University has elected to use the cash basis of accounting for its financial reports submitted during fiscal year 2010. However, we noted the outlays on one SF-269 report and seven SF-425 reports prepared on the cash basis and submitted by the University included certain accruals for expenditures paid subsequent to the reporting period.
- The University did not report unliquidated obligations in two SF-269 reports and nine SF-425 reports selected for testwork.
- The University inaccurately reported the indirect cost base and indirect costs on one SF-269 report prepared and submitted by the Urbana campus. The amounts reported for the indirect cost base and indirect costs did not agree to the general ledger and were overstated by \$25,000 and \$14,625, respectively.

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110) and the grant agreements, contracts, and other award documents for the major programs identified above, require the University to prepare periodic Financial Status Reports (SF-269 (OMB No. 0348-0039) and Federal Financial Reports (SF-425 (OMB No. 0348-0061). The instructions for the reports define the cash basis amount for outlays as the sum of actual cash disbursements for the direct costs of goods and services, the amount of indirect expense charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subrecipients and for unliquidated obligations as obligations incurred, but not yet paid. OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure financial status reports are complete, accurate, and prepared using the accurate basis of accounting.

In discussing these conditions with University officials, they stated they disagreed with the finding.

Failure to prepare reports on the appropriate basis of accounting inhibits the ability of the federal agencies to properly monitor and evaluate the performance of the programs. (Finding Code 10-15, 09-15)

Recommendation:

We recommend the University implement procedures to ensure the information reported in its financial status reports are complete, accurate, and on the appropriate basis of accounting.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

University Response:

Accepted. The University will review its procedures for quarterly reporting to ensure financial outlays are reported accurately.

- CES (first 2 bullet points):
 - The University agrees that the SF-269 and FFR-425 reports were indicated as cash basis but included certain accruals and expenditures paid subsequent to the reporting period.
 - The University does not agree with the finding related to not reporting the unliquidated obligations. The SF-269 and FFR-425 reports do not include any unliquidated obligations because any remaining obligations are erroneous and were in the process of being closed by the University's Purchasing department.
- UIUC (third bullet point):
 - The University agrees that data from Banner was keyed incorrectly into an internal worksheet that was used to prepare the annual financial report for the one award in question. Banner system data was correct. Refresher training in the use of internal worksheets that are used in the preparation of financial reports has been provided by supervisors.

Finding 10-16 Inaccurate ARRA 1512 Reports

The University did not accurately report expenditure information in Section 1512 reports submitted for the Research and Development Cluster program.

The University is required to prepare quarterly American Recovery and Reinvestment Act (ARRA) Section 1512 reports for awards funded by ARRA. These reports are intended to provide transparency into how Federal dollars are being spent and drive accountability for the timely, prudent, and effective spending of recovery dollars. During our testwork of two Section 1512 reports prepared and submitted by the Urbana campus for the Research and Development Cluster for the quarter ended March 31, 2010, we noted the expenditure data supporting the cumulative expenditures reported did not correspond with the required reporting time period. Specifically, the March 31, 2010 Section 1512 reports were prepared using expenditure data as of February 28, 2010. Upon review of the Section 1512 reports submitted for the quarter ended June 30, 2010, we noted these reports were prepared using expenditure data as of May 31, 2010.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Section 1512(c)(2) of the American Recovery and Reinvestment Act requires each recipient that received recovery funds from a Federal agency to submit a report to that agency not later than 10 days after the end of each calendar quarter, that contains the amount of recovery funds received that were expended or obligated to projects or activities through the reporting date. Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations* (OMB Circular A-110) requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure data reported in Section 1512 reports is accurate.

In discussing these conditions with University officials, they stated the University applied the "Best Available Data" reporting model recommended by Council on Government Relations (COGR).

Failure to prepare accurate reports inhibits the ability of the grantor to properly monitor and evaluate the performance of the program activities. (Finding Code 10-16)

Recommendation:

We recommend the University revise its procedures to ensure expenditure data reported in Section 1512 reports corresponds to the applicable reporting period.

University Response:

Not accepted. Only four of the nineteen federal agencies listed above have ARRA funded awards requiring the University to submit Section 1512 reports.

US Department of Commerce (USDOC)
National Science Foundation (NSF)
US Department of Energy (USDOE)
US Department of Health and Human Services (USDHHS)

The University relied on guidance from COGR and OMB for the implementation of the "Best Available Data" reporting model (Guidance from COGR is available on the COGR website). Federal agencies and OMB are currently in discussion on this subject, and further clarification from OMB is expected.

Using the "Best Available Data" reporting model is necessary to allow sufficient time to extract and analyze data, create reports for PI review, and lastly, to populate detailed data in the required federal ARRA reporting templates and upload these reports by the reporting deadline.

The Urbana campus elected to use the "Best Available Data" reporting model due to the extremely tight federally-mandated deadline of 10-calendar days to submit the required 131 prime recipient reports, out of the total 175 ARRA funded awards, on the federal website. Estimated data for federal ARRA reports cannot be supported in a review or audit. Using the "Best Available Data" reporting model allows the data in the reports to

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

be reconciled to and supported by actual expenditure and payroll detail in the financial accounting system (Banner).

The "Best Available Data" reporting model is documented in our procedures and has been consistently applied at the Urbana campus since the first ARRA reporting period.

Auditors' Comment:

Section 1512(c)(2) of the American Recovery and Reinvestment Act requires each recipient that received recovery funds from a Federal agency to submit a report to that agency not later than 10 days after the end of each calendar quarter, that contains the amount of recovery funds received that were expended or obligated to projects or activities **through the reporting date**. The data reported by the University does not meet this requirement. Based on communications from OMB, we understand the concept of best available information does not allow for a period other than the reporting period specified by ARRA (i.e. quarter end).

Questioned Costs: None

Finding 10-17 Inaccurate Amounts Reported in Quarterly Federal Financial Reports

The University did not accurately report cash disbursements in its quarterly federal financial reports submitted for the Cooperative Extension Services.

The University is required to prepare periodic federal financial reports for the Cooperative Extension Service program administered by the Urbana campus. These reports include information on cash disbursements, cash receipts, and cash on hand for the program during the reporting period. During our testwork over the

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Cooperative Extension Service program, we selected two quarterly federal financial reports submitted during the fiscal year ended June 30, 2010 and noted the cash disbursements reported were understated by \$235,000. Specifically, the quarterly expenditure reports submitted for the quarters ended December 31, 2009 and March 31, 2010, improperly reported the "Cash Disbursements" line item as follows:

Quarter Ended	Amount Reported	Correct Amount	Difference
December 31, 2009	\$6,755,649	\$6,990,649	\$235,000
March 31, 2010	8,541,925	8,776,925	235,000

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110) and the grant agreements, contracts, and other award documents for the major programs identified above, require the University to prepare periodic Federal Financial Reports (SF-425 (OMB No. 0348-0061). The instructions for the financial status report require information relative to cash disbursements to enter the cumulative amount of Federal fund disbursements (such as cash or checks) as of the reporting period end date. Disbursements are the sum of actual cash disbursements for direct charges for goods and services, the amount of indirect expenses charged to the award, and the amount of cash advances and payments made to subrecipients and contractors. OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure data reported in financial status reports is accurate.

In discussing these conditions with University officials, they stated these reporting errors were the result of cash receipts and expenditures being miscoded in the general ledger to the Hatch grant funds in the Research and Development Cluster.

Failure to prepare accurate reports inhibits the ability of the grantor to properly monitor and evaluate the performance of the program activities. (Finding Code 10-17)

Recommendation:

We recommend the University implement procedures to ensure the financial status reports submitted for its federal awards are accurate.

University Response:

Accepted. The University will improve procedures to ensure financial status reports are accurate.

02/S08030/S08064 (10.500)

Questioned Costs: \$8,000

Finding 10-18 Expenditures Reported in the Incorrect Accounting Period

The University reported expenditures under its Research and Development Cluster and Cooperative Extension Services programs in the incorrect accounting period.

During our review of 40 payroll expenditures to the Research and Development Cluster program (totaling \$28,714) and 40 other than personal services expenditures charged to the Cooperative Extension program (totaling \$367,667), we noted the following:

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

- One payroll expenditure charged to the Research and Development Cluster program in fiscal year 2010 improperly excluded three days of compensation from the July 10, 2009 timesheet. Specifically, the hours reported in fiscal year 2009 erroneously included the first three days in fiscal year 2010 for a total of 18.5 hours. As a result, the hours and related payroll costs reported in fiscal year 2010 for this award were understated by 10.5 hours and \$84, respectively.
- Two contractual services expenditures charged to the Cooperative Extension Services program in fiscal year 2010 improperly included prepayments of subscriptions for periodicals and database access services to be used in future periods. Expenditures reported in fiscal year 2010 benefiting future periods totaled \$8,000.

Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure expenditures are reported in the proper accounting period.

In discussing these conditions with University officials, they stated they disagree with the finding.

Reporting of expenditures in the incorrect accounting period results in inaccurate financial reporting and may result in expenditures outside the period of availability being charged to federal programs. (Finding Code 10-18)

Recommendation:

We recommend the University implement procedures to ensure expenditures are reported in the proper accounting period in its grant accounts.

University Response:

Accepted. The University notes that while one data entry error did improperly report \$84 in the wrong University fiscal year, this did not impact the award. There was no detriment to the award, and the costs were not overstated. We do not agree that this resulted in inaccurate charges to the award.

Auditors' Comment:

As noted in the finding above, there were several exceptions in our testwork in which the University did not report expenditures in the appropriate period. These expenditures were reported in an improper period and could have resulted in expenditures outside the period of availability being charged to federal programs. We recommend the University implement procedures to ensure expenditures are reported in the proper accounting period.

Program Name: Research and Development Cluster

CFDA # and Program Expenditures: Various (\$541,078,403)

Award Numbers: Various

Questioned Costs: None

Finding 10-19 <u>Inadequate Documentation to Support Key Personnel</u>

Adequate supporting documentation did not exist to substantiate key personnel worked on the grants for which they were specified in the proposal for the Research and Development Cluster.

In an effort to secure federal awards from various federal agencies, the University is often required to commit certain researchers or other University personnel to minimum participation levels on specific federal projects. These individuals are identified as key personnel in the award documents and any changes to their committed level of participation require federal approval.

During our testwork over a sample of 40 completed Research and Development Cluster program projects, we noted three individuals identified as key personnel (one individual at the Urbana campus and two individuals at the Chicago campus) in award documents for which the University could not provide adequate documentation supporting the individuals worked on the projects at the required level of participation. The University provided project deliverables identifying these individuals were involved in the project activities; however, the University

76

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

could not provide effort certifications, expenditure confirmations, or personnel appointment forms evidencing these individuals provided effort to the projects at the levels required by the award documents. Additionally, the University could not provide documentation evidencing the awarding agency approved the removal of the key personnel from these projects.

According to the OMB Compliance Supplement, dated June 2010, any persons listed as key personnel in the award documents are considered essential to the work being performed on the project. Before removing, replacing, or diverting any of the listed or specified personnel, the grantee must: (1) notify the awarding agency reasonably in advance; (2) submit justification (including proposed substitutions) in sufficient detail to permit evaluation of the impact on the award; and (3) obtain the awarding agency's written approval. Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure adequate documentation of the effort of key personnel on sponsored awards is maintained.

In discussing these conditions with University officials, they stated adequate supporting documentation in the form of reports, presentations, and interpersonnel agreements evidence that the principal investigators in question were involved in their respective research projects as noted in the original award documents.

Failure to notify the awarding agency before removing or replacing key personnel on a grant could result in the loss of federal funds. (Finding Code 10-19)

Recommendation:

We recommend the University implement a process to notify the awarding agency in writing if key personnel are removed or replaced on the award and if the key personnel's pledged effort is modified from the award document. Additionally, documentation supporting employee effort should conform to the requirements of OMB Circular A-21.

University Response:

UIUC Response

Not accepted. We disagree that key personnel were "removed or replaced" or that effort was "modified from the award document" for the project in question at the Urbana campus.

For the project:

• The Principal Investigator (PI) listed "pending" support for one summer month of time in the "current and pending support" section of the initial proposal. However, no salary support for the PI was requested or received from the sponsor as evidenced in the budget section of the final proposal and in the final awarded agreement.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

- The "pending" support listed in the initial proposal did not transition to actual support in the final agreement executed by the sponsor the "award document"; no salary support for the summer month was included by the sponsor in the final awarded amount.
- The one unsupported summer month was unpaid, personal time of the PI. There are no University payroll records for unpaid, personal time. Expenditure confirmations are applicable only for direct costs charged to the project.
- The sponsor did not support the summer month, no salary was charged to the project, and no expenditure confirmation is applicable. Nor can the PI's personal, unpaid time spent on this project be either tracked or claimed by the University as committed cost-sharing.
- No University resources in the form of academic year salary paid by the University were committed as cost-sharing for the project.

The PI's time spent on the project during the summer month for which no support was included in the budget is voluntary uncommitted cost sharing which is defined by OMB as: "University faculty (including senior researchers) effort that is over and above that which is committed and budgeted for in a sponsored agreement."

As evidenced in the award documentation, the summer month was not budgeted in the agreement executed by the sponsor, and the "over and above" effort is voluntary uncommitted cost sharing. OMB provides further clarification stating that "Voluntary uncommitted cost sharing should be treated differently from committed effort and should not be included in the organized research base for computing the F&A rate or reflected in any allocation of F&A costs. Furthermore, such faculty effort is excluded from the effort reporting requirement in [A-21] Section J.8."

We do not agree with the audit firm's claim the PI was "removed or replaced" on this project or that effort was "modified from the award document". The suggested audit procedures in the OMB A-133 Compliance supplement are to determine if key personnel "were involved in the project as required". The PI was actively involved in the work leading to the successful completion of this project, which is evidenced by documentation provided to the audit firm in the form of a research paper co-authored by the PI describing the activities and outcomes of this project. The successful completion of the project, as well as the work described in the research paper co-authored by the PI, supports the PI's involvement with and contribution of personal effort to this project that was completed in 2008.

UIC Response

Accepted. The University does recognize that there was one instance where there was a failure to notify the awarding agency before removing or replacing key personnel. The University will reinforce the procedures for appropriate notification of awarding agencies of key personnel removed or replaced on awards.

Additionally, the University will obtain documentation for employee effort supported by IPA agreements.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Auditors' Comment:

As noted in the finding above, the University was unable to provide documentation evidencing the effort expended by key personnel was consistent with that specified in the grant award and was unable to provide documentation supporting the awarding agency approved a change in the key personnel. We continue to recommend the University implement procedures to ensure documentation of the effort expended by key personnel is consistent with OMB Circular A-21.

Questioned Costs: None

Finding 10-20 Failure to Obtain Suspension and Debarment Certifications from Vendors

The University did not obtain required certifications that certain vendors were not suspended or debarred from participation in federal assistance programs.

During our review of 240 contractual expenditures for the Research and Development Cluster, Cooperative Extension Services, Supplemental Nutrition Assistance Program, Child Care Development Fund, Education and Human Resources, Foreign Language, AIDS Education and Training Centers, Maternal and Child Health Services Block Grant to States, and Homeland Security Cluster programs, we noted 10 expenditures for which the University did not obtain a suspension and debarment certification from the vendor. Additionally, the University did not perform a verification check with the "Excluded Parties List System" (EPLS) maintained by the General Services Administration for the vendors. Upon further review, we noted the University does not obtain a suspension and debarment certification or perform a verification check with the EPLS from vendors for which it procures goods through a purchase order (i.e. no signed contract). All vendors in our sample for which the University entered into a signed contract appropriately contained a suspension and debarment certification from the vendor.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Total contractual expenditures charged to the major programs during the year ended June 30, 2010 were as follows:

Program Name	Contractual Expenditures
Research and Development	\$106,555,747
Cooperative Extension Services	4,828,113
SNAP	1,396,761
MCH Block Grant	783,654
Homeland Security	1,027,062

According to OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110), non-federal entities are prohibited from contracting with or making subawards under covered transactions to parties that are suspended or debarred or whose principals are suspended or debarred. "Covered transactions" include those procurement contracts for goods and services awarded under a nonprocurement transaction (e.g., grant or cooperative agreement) that are expected to equal or exceed \$25,000 or meet certain other specified criteria. All nonprocurement transactions (i.e., subawards to subrecipients), irrespective of award amount, are considered covered transactions. When a non-federal entity enters into a covered transaction with an entity at a lower tier, the non-federal entity must verify that the entity is not suspended or debarred or otherwise excluded. This verification may be accomplished by checking the Excluded Parties List System (EPLS) maintained by the General Services Administration, collecting a certification from the entity, or adding a clause or condition to the covered transaction with that entity.

OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures in place to ensure the required certifications for covered contracts and subawards are received, documented, and contracts not made with a debarred or suspended party.

In discussing these conditions with University officials, they stated the University Purchasing Division has procedures in place which were originally designed to comply with this requirement; however, transition of the process from a paper-based listing for suspended and debarred vendors to an electronic, Web-based listing resulted in an unintended alteration of the process.

Failure to obtain the required certifications or perform verification procedures with the EPLS could result in the payment of federal funds to vendors that are suspended or debarred from participation in federal assistance programs. (Finding Code 10-20, 09-16)

Recommendation:

We recommend the University establish procedures to ensure vendors certify that their organization is not suspended or debarred or otherwise excluded from participation in federal assistance programs.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

University Response:

Accepted. The University's Purchasing Department has established procedures and trained staff to perform verification checks using the Excluded Parties List System (EPLS). For all orders over \$5,000 to be charged to a Federal fund, purchasing staff checks the data in the EPLS prior to entering into the purchasing agreement to ensure that the vendor is eligible. The staff documents the results from the search and includes the screen print in the file documentation. Purchasing is redesigning the procurement checklist to document that this procedure is being followed when appropriate. No vendors involved in FY10 purchasing agreements have been found to be debarred or suspended.

Questioned Costs: None

Finding 10-21 Failure to Properly Perform Interest Calculations on Federal Advances

The University does not properly calculate interest on federal funds drawn in advance.

The University receives federal funds on an advance basis under the Research and Development Cluster, Cooperative Extension Services, Supplemental Nutrition Assistance Program, Education and Human Resources, AIDS Training and Education Centers, and Maternal and Child Health Services Block Grant. During our testwork, we noted the University has not performed an interest calculation for any of the programs or grants on which it received advanced funding as required by federal regulations. The University calculated interest on the net cash position of all its federal awards as of June 30, 2010; however, this methodology has not been approved by the University's federal cognizant agency (USDE).

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110) requires advances of federal funds to be maintained in interest bearing accounts and interest earnings in excess of \$250 to be remitted to the federal government. OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure interest calculations are performed and interest is remitted as required.

In discussing these conditions with University officials, they stated the University is in compliance with OMB Circular A-110 and does have effect and adequate internal controls in place.

Failure to properly perform required interest calculations results in noncompliance with cash management regulations. (Finding Code 10-21, 09-17)

Recommendation:

We recommend the University implement procedures to properly calculate interest on federal funds received in advance of expenditures and to remit any interest earned to the appropriate federal agencies as required by federal regulations.

University Response:

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Not accepted. This is a repeat finding from FY09. It is pending resolution.

The University has been performing a calculation of interest based on the net cash position of its advances. We believe the methodology is adequate for compliance with OMB Circular A-110. The results of the calculation have shown that there was no excess federal cash on hand and no interest due.

The methodology is being addressed by the University's cognizant for clarification and guidance on this issue. We have provided documentation as requested to the cognizant for review. The University has not yet received a response.

Auditors' Comment:

We recommend the University work with their Federal cognizant agency (U.S. Department of Education and OMB) to determine whether interest calculations should be performed at a lower level, such as by individual letter of credit, program, or federal agency.

Award Numbers: Various (R&D)

Questioned Costs: None

Finding 10-22 Failure to Notify Subrecipients of Federal Funding and Communicate ARRA Information

The University did not provide required program and ARRA information relative to federal funds passed through to the subrecipients of the Research and Development Cluster program for the year ended June 30, 2010.

During our testwork of 40 subrecipients who expended \$20,442,896 of the Research and Development Cluster program funds, we noted the Chicago campus did not communicate in the grant award documents or in funding notification letters to the subrecipients the following:

- The specific program name or CFDA number under which federal funding had been provided for four subrecipients expending \$2,076,883 during the year ended June 30, 2010.
- The award was funded by ARRA funds for two subrecipients expending \$236,679 during the year ended June 30, 2010.
- The Federal award number under which federal funding had been provided for one subrecipient expending \$186,679 during the year ended June 30, 2010.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

In addition, during our testwork over disbursements to subrecipients of the Research and Development Cluster program, we noted the University did not identify the federal award number, catalog of federal domestic assistance (CFDA) number, or the amount attributable to ARRA at the time of each disbursement.

Subrecipient expenditures under the Research and Development Cluster program for the year ended June 30, 2010 were \$59,266,999, of which, \$1,335,985 was funded by ARRA.

According to OMB Circular A-133 §__.400(d), a pass-through entity is required to identify federal awards made by informing each subrecipient of the CFDA title and number, award name and number, and award year. The pass through entity is also required to advise subrecipients of requirements imposed on them by federal laws and regulations. According to the American Recovery and Reinvestment Act, Federal Agencies must require recipients to agree to: (1) separately identify to each subrecipient, and document at the time of the subaward and disbursement of funds, the Federal Award number, CFDA number, and the amount of ARRA funds; and (2) require their subrecipients to provide similar identification in their SEFA and data collection form. Additionally, OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure subrecipient award communications contain all required information.

In discussing these conditions with University officials, they stated the CFDA number is provided on subrecipient agreements when it is available at the time the subaward is executed, or it is provided later, when it is available. If the CFDA number is not available, initially, other information describing the project is outlined in the sub agreement, as allowed in OMB Circular A-133. University officials also stated the University's systems were not initially set up to meet the disbursement requirement.

Failure to inform subrecipients of federal award information could result in subrecipients improperly omitting expenditures from their schedule of expenditures of federal awards, expending federal funds for unallowable purposes, or not receiving a single audit in accordance with OMB Circular A-133. (Finding Code 10-22, 09-30)

Recommendation:

We recommend the University review its current process for preparing subrecipient funding notifications to ensure all required information is properly communicated to its subrecipients. Additionally, we recommend procedures be modified to ensure required information is provided to subrecipients with each disbursement of ARRA funding.

University Response:

Accepted. A procedure has been in place since June 2010 at the Urbana campus where repeat notifications of the required ARRA-related elements are sent for each reimbursement under an ARRA-related subaward. The repeat notifications are sent at the time of disbursement and contain the Federal Award number, CFDA number, and the amount of ARRA funds being disbursed.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

The Chicago campus will implement a procedure to notify subrecipients of the required information in the funding notifications and with each disbursement of ARRA funding.

Finding 10-23 Inadequate Monitoring of Subrecipient OMB Circular A-133 Audit Reports

The University is not adequately performing or documenting reviews of subrecipient OMB Circular A-133 audit reports. Additionally, the Chicago campus does not have a system to track and follow-up with subrecipients when OMB Circular A-133 reports have not been received.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

The University requires subrecipients expending more than \$500,000 in federal awards during their fiscal year to (1) submit OMB Circular A-133 audit reports or (2) provide written notification that an audit was conducted in accordance with OMB Circular A-133 and the schedule of findings and questioned costs disclosed no audit findings relating to the Federal awards that were pass-through the University (notification letter). University staff in the Office of Grants and Contracts are responsible for reviewing the OMB Circular A-133 audit reports and determining whether the audit reports meet the audit requirements of OMB Circular A-133, evaluating the type of audit opinion issued (i.e. unqualified, qualified, adverse), and issuing management decisions on findings reported within required timeframes. However, there is no documentation of the "desk reviews" performed, nor does management use a checklist to help determine whether the audit reports meet the audit requirements of OMB Circular A-133 and whether management decisions have been issued on findings reported within required timeframes. Lastly, we noted the Chicago Campus does not have a process to track and follow-up with subrecipients when OMB Circular A-133 reports or notification letters have not been received.

Additionally, during our testwork over 40 subrecipients of the Research and Development Cluster program we noted the following:

- There were four subrecipients at the Chicago campus for which a management decision was required, but was not issued by the University.
- There were 17 subrecipients at the Chicago campus for which A-133 audit reports were submitted after the nine month filing deadline. These files contained no documentation the University followed up on the delinquent report or approved an extension of the filing deadline.

Subrecipient expenditures under the federal programs for the year ended June 30, 2010 were as follows:

Program	Total Fiscal Year 2010 Subrecipient Expenditures	Total Fiscal Year 2010 Program Expenditures	%
Research and Development Cluster	\$59,266,999	\$541,078,403	10.95%
Foreign Language	\$546,841	3,542,579	15.44%
AIDS	\$1,278,642	2,751,490	46.47%

According to OMB Circular A-133 § ...400(d), a pass-through entity is required to monitor the activities of subrecipients as necessary to ensure that Federal awards are used for authorized purposes in compliance with laws, regulations, and the provisions of contracts or grant agreements and that performance goals are achieved. According to the OMB Circular A-133 compliance supplement, dated June 2010, a pass-though entity is required to 1) ensure that subrecipients expending \$500,000 or more in Federal awards during the subrecipient's fiscal year have met the audit requirements of OMB Circular A-133 and that the required audits are completed within nine months of the end of the subrecipient's audit period, 2) issue a management decision on audit findings within six months after receipt of the subrecipient's audit report, and 3) ensure that the subrecipient takes timely and appropriate corrective action on all audit findings. In the cases of continued inability or unwillingness of a subrecipient to have the required audits, the pass-through entity shall take appropriate action using sanctions.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

In discussing these conditions with University officials on the Chicago campus, they stated that the problems were due to inadequate follow-up procedures being in place.

Failure to obtain and adequately review subrecipient OMB Circular A-133 audit reports and issue management decisions in a timely manner may result in federal funds being expended for unallowable purposes and subrecipients not properly administering federal programs in accordance with laws, regulations, and the grant agreement. (Finding Code 10-23, 09-18)

Recommendation:

We recommend the University establish procedures to ensure all subrecipients receiving federal awards have audits performed in accordance with OMB Circular A-133. Additionally, desk reviews of A-133 audit reports should be formally documented using an A-133 desk review checklist and management decisions should be issued within six months.

University Response:

Accepted. The University will implement procedures to strengthen oversight of subrecipient monitoring and follow-up activities.

Schedule of Findings and Questioned Costs

Award Numbers: Various (R&D)

G6517120 (93.994)

Questioned Costs: \$62,207

Finding 10-24 *Unallowable Costs Charged to Federal Program*

The University claimed expenditures under the Maternal and Child Health Services Block Grant to the States (MCH Block Grant) program and used expenditures to meet cost share requirements of the Research and Development Cluster that are unallowable.

During our review of 40 other than personnel expenditures (totaling \$127,402) charged to the MCH Block Grant program and 41 expenditures (totaling \$18,802,603) used to meet cost sharing requirements of the Research and Development Cluster, we noted the following:

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

- One expenditure for computer service fees charged to the MCH Block Grant program administered by the Chicago campus for which the amount reimbursed by the grantor was in excess of the actual charge. The University recorded the expenditure as the amount of the purchase order (\$208), but the actual invoiced amount was \$183. As a result, the grant was overcharged \$25.
- One expenditure (in the amount of \$882) for the installation of telecom lines, which was used to meet the cost share requirement of a Research and Development Cluster award administered by the Chicago campus, was allocated using an unapproved and undocumented allocation methodology.
- Two subrecipient expenditures (in the amount of \$3,950), which were used to meet cost share requirements of a Research and Development Cluster award at the Chicago campus, were not adequately supported. Specifically, we noted the documentation for these expenditures consisted solely of budgetary documents.
- Three subrecipient expenditures (in the amount of \$57,250), which were used to meet cost share requirements of Research and Development Cluster awards at the Urbana campus, did not contain sufficient details to determine the nature of types of expenditures. Specifically, we noted the documentation for these expenditures consisted solely of a letter obtained from the subrecipient certifying the total cost share amount.

OMB Circular A-21, *Cost Principles for Higher Education Institutions*, establishes principles and standards for determining costs for federal awards carried out through grants, cost reimbursements contracts, and other agreements with higher education institutions. To be allowable under federal awards, costs must meet certain general criteria. Those criteria, among other things, require that the expenditures must be allocable, reasonable, and supported by adequate documentation.

Additionally, OMB Circular A-110 requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure expenditures are properly supported in accordance with OMB Circular A-21.

In discussing these conditions with University officials, they stated the University received sufficient information to document the cost share requirements.

Failure to properly determine the allowability of costs in accordance with program regulations may result in costs inconsistent with program objectives being charged to federal programs or result in the University not meeting its cost share requirement. (Finding Code 10-24)

Recommendation:

We recommend the University implement procedures to ensure only expenditures made for allowable costs are claimed.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

University Response:

UIC Response

Partially accepted. The University has procedures to ensure that allowable costs are charged to federal programs. The P-Card transaction for the computer service fee was agreed upon and charged by the vendor, and appropriately reconciled. The invoiced amount of \$183 reflects a \$25 credit, subsequently issued by the vendor. The \$25 difference is immaterial.

The University agrees to obtain additional supporting documentation for cost sharing commitments. However, the Research and Development Cluster expenditures referenced for the Chicago Campus were used to satisfy cost sharing commitments and were not directly charged to federal programs.

<u>UIUC Response</u>

Not accepted. The University believes that certified statements from our research partners are sufficient documentation for the amount of the third party cost share. The University will consider asking for additional information from our research partners at a level of detail that does not exceed that required for billings of direct expenditures.

Auditors' Comment:

As noted in the finding above, the University did not receive sufficient information to determine the nature of the expenditures provided by the subrecipient to meet its cost share requirement. The information received simply included a dollar amount which is less detailed than the information required by the University for federal expenditures reported by its subrecipients. As documentation requirements pertaining to cost sharing expenditures are the same as federal expenditures, we do not believe the documentation received for cost share expenditures provided by subrecipients is adequate under OMB Circular A-21.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Federal Agency: US Department of Agriculture (USDA)

Program Name: Supplemental Nutrition Assistance Program (SNAP)

CFDA # and Program Expenditures: 10.551/10.561 (\$8,128,913)

Award Numbers: 81X6287000

Questioned Costs: None

Finding 10-25 Inaccurate Quarterly Expenditure Reports Prepared for the SNAP Program

The University did not accurately report federal expenditures in quarterly reports for the SNAP Program submitted to the Illinois Department of Human Services (IDHS).

The University is required to prepare a quarterly expenditure report for the SNAP program which identifies the expenditures incurred to date under the federal award and used to meet the matching requirement. The quarterly expenditure reports are used by IDHS to determine the amount to be reimbursed to the University (reported on the line item "Total IDHS Share") and to monitor the University's progress towards the matching requirement.

During our testwork over the quarterly expenditure report submitted for the quarter ended December 31, 2009, we noted the University improperly reported the "Total IDHS Share" line item as half of the combined amounts of federal and matching expenditures. As a result, the "Total IDHS Share" line item was overstated by \$383,195 for the quarter ended December 31, 2009. Upon review of the quarterly reports submitted during the University's fiscal year, we noted the following differences in the amounts reported for the "Total IDHS Share line" item:

Quarter Ended	Amount Reported	Correct Amount	Difference
September 30, 2009	\$1,510,162	\$1,510,128	\$34
December 31, 2009	1,510,551	1,127,356	383,195
March 31, 2010	1,642,271	1,534,200	108,071
June 30, 2010	1,520,658	2,011,924	(491,266)

The University indicated IDHS requested these amounts to be reported this way as the federal expenditures and matching expenditures all qualify for federal reimbursement; however, the matching expenditures include in-kind contributions from local governments which are not allowed to be reimbursed from federal sources.

The Illinois Food Stamp Nutrition Education Plan/Supplemental Nutrition Assistance Program Nutrition Education and the grant agreement between IDHS and the University, require the Urbana campus to provide matching expenditures (cost share) of \$7,508,756, or an amount equal to federal expenditures, from non-federal sources.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure quarterly expenditure reports accurately report the grantor's share of expenditures.

In discussing these conditions with University officials, they stated they believe the data in the table is inaccurate, and it does not follow the billing methodology that is approved by the funding agency.

Failure to prepare accurate reports inhibits the ability of the grantor to properly monitor and evaluate the performance of the program activities. (Finding Code 10-25, 09-21)

Recommendation:

We recommend the University implement procedures to ensure the quarterly expenditure reports accurately reflect the grantor's share of expenditures.

University Response:

Not accepted. This is a Prior Year Finding from FY09, which was not accepted by the University and is pending sponsor resolution and guidance.

The federal expenditures on this program are accurately reported; the data in the table prepared by the auditing firm for this finding is inaccurate because it does not follow the billing methodology approved by the funding agency, IDHS. The program sponsor, IDHS, approved the University's billing and reporting methodology for the federal expenditures on this program, as noted above. Under this program, the mandatory cost-share is a one-to-one match of direct expenditures taken over the life of the award and is fully reconciled at the end of the State of Illinois and Federal fiscal year.

The in-kind contributions from local governments, which include teacher salaries, were not reimbursed from federal sources and are allowable to meet the cost-sharing commitment. The UI Extension has procedures to verify the teacher salaries used as in-kind cost share contributions are not directly reimbursed from any federal source of funds. The UI Extension offices require potential program contributors to submit Form A, 'Confirmation of Community In-Kind Cost Share Contributions'. This form, signed by contributors, states, "I confirm the Source of Funding for these contributions are NOT directly or indirectly from Federal Government or Private monies." The form provided by the school officials certifying the source of funding for the teacher salaries is not from federal funding has been accepted by the sponsor as satisfactory documentation to support this portion of the required cost-share commitment. The University provided the audit firm a copy of this form with the confirmation language during the FY09 audit; the firm did not request a copy of the documentation in FY10, but the substance of the form has not changed.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Auditors' Comment:

As discussed in the finding above, we believe the report is inaccurate and results in the improper reimbursement of expenditures under the SNAP program. Additionally, the grant agreement between IDHS and the University requires the University to provide matching expenditures (cost share) from non-federal sources over the term of the grant, which covers more than the current year. The allocable portion of matching requirement for the current year based on a one-to-one ratio to federal expenditures is \$7.5 million.

Finding 10-26 Failure to Follow Property Management Regulations

The University did not consistently follow property management regulations relative to equipment purchased with federal funding from the Research and Development Cluster and Cooperative Extension Services programs.

The University conducts research and extension services in multiple locations on each of its three campuses, as well as at off-campus locations throughout the State. Equipment items purchased with federal funds are utilized at each of these locations. The University identifies all equipment in its property management records with

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

individually assigned asset numbers and each individual asset record includes the specific location of the asset, the federal award general ledger account number which funded the purchase of the asset, and other required information. An asset tag with the assigned asset number is affixed to each asset in accordance with University policy and State Property Management Regulations.

During our physical observation of 40 pieces of equipment purchased with Research and Development Cluster funds and 40 pieces of equipment purchased with Cooperative Extension Services Program funds, we noted the following:

- One item included on the Research and Development Cluster inventory list (with a cost value of \$35,560) was transferred to a different institution but the transfer request form was not completed or reviewed before the equipment was physically transferred.
- Two items included on the Research and Development Cluster inventory list (with cost values totaling \$42,285) did not have visible property control tags affixed to the assets at the time of our procedures.
- Two items included on the Cooperative Extension Services inventory list (with cost values totaling \$12,548) were not located by the Urbana campus at the time of our procedures.

Additionally, during our review of the University's bi-annual physical inventory records, we noted twelve departments (out of 40 selected for testing) could not locate documentation evidencing the performance of the bi-annual inventory procedures.

As of June 30, 2010, the cumulative cost value of equipment purchased with Research and Development Cluster and Cooperative Extension Services Program funds was \$195,063,938 and \$2,043,986, respectively.

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110) requires that equipment be used in the program which acquired it or, when appropriate, other federal programs. Additionally, OMB Circular A-110 requires the University to implement an appropriate control system to safeguard equipment and to ensure equipment is adequately maintained.

Additionally, OMB Circular A-110 requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure equipment inventory records are accurate and equipment items are properly tagged.

In discussing these conditions with University officials, they stated extensive policies and procedures are in place to ensure control over equipment. The property accounting records of the University had identified the items as being within the assigned units; however, the University could not locate certain items during the audit for several reasons. Some items could not be located in the relatively short time available during the audit, in part because of the large size and highly decentralized nature of the University; and were subsequently located after the observations had been completed. Regarding cases of inventory tags not being affixed to certain assets, University management stated that some of these instances can be challenging to manage. They noted one instance of a missing tag related to an item with a hand written tag because it had recently been upgraded and a replacement tag had not been ordered.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Failure to maintain accurate property records and tag equipment purchased with federal funds prohibits the University from properly safeguarding and maintaining equipment and may result in federal programs not receiving the appropriate share of proceeds from the disposals of equipment purchased with federal funds. (Finding Code 10-26, 09-24)

Recommendation:

We recommend the University implement procedures to ensure property records accurately reflect equipment onhand and to ensure equipment items are properly tagged in accordance with property management regulations.

University Response:

Accepted. This is a repeat finding from FY09. The University will continue its ongoing efforts to ensure that its property control policies/procedures are followed and identify opportunities for improvement. However, we note the following:

Bullet 2

Item 1 - This piece of equipment had a temporary property control tag written in permanent marker. This piece of equipment had recently been sent to the manufacturer for an upgrade. During the transport and upgrade process, the permanent tag was lost. When the equipment was returned from the manufacturer after the upgrade, a replacement permanent P-Tag was subsequently ordered.

Item 2 - This equipment is a small component piece (a switch), which is part of a larger piece of equipment, and is too small to allow the affixing of a standard size property control tag. To accommodate these space constraints, the department created a special miniaturized tag that is affixed to this component piece. This equipment is located offsite at Northwestern University. At the time the auditing firm's observation was scheduled, the responsible manager at Northwestern was out of town and a liaison was designated to conduct the equipment observation. Due to the liaison's unfamiliarity with the unique tagging, he was unable to point out the tag to the auditing firm at the initial observation.

The Grants and Contracts Office personnel and the equipment manager confirmed the miniature tag is in place. The auditors did not schedule a second observation to view the tag on this equipment; the University recommends a second observation be scheduled when the equipment manager is available.

Bullet 3

This piece of equipment was located and is available for observation.

Questioned Costs: \$8,500

Finding 10-27 Failure to Properly Determine SFA Awards in Accordance with Program Regulations

The University disbursed funds in excess of program award limits at its Chicago campus.

During our testwork over 55 students (25 from the Urbana campus and 30 from the Chicago campus) who were awarded and disbursed student financial aid totaling \$857,367, we noted one student from the College of Medicine at the Chicago campus who received a subsidized direct loan in excess of the annual loan limit of \$8,500 for which the student was eligible. The student was awarded subsidized loan funds in the amount of \$17,000 during the 2009-2010 academic year resulting in an over-award of \$8,500. Total aid awarded to this student during the year ended June 30, 2010 was \$54,309.

The University awarded approximately \$525,358,275 in federal financial assistance to students.

According to 34 CFR 685.203, the total amount a graduate or professional student may borrow for any academic year of study under the Federal Direct Stafford/Ford Loan Program in combination with the Federal Stafford Loan Program may not exceed \$8,500. Additionally, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving awards to establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal control should include procedures to ensure student awards are packaged in accordance with program regulations.

In discussing these conditions with University officials, they stated the cause was human error.

Failure to properly determine eligibility and package financial aid in accordance with federal regulations may result in students receiving awards for which they are not eligible which would results in unallowable costs or may result in students not receiving awards that they may be entitled to receive. (Finding Code 10-27)

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Recommendation:

We recommend the University review its current procedures for awarding federal assistance and implement any changes necessary to ensure student financial assistance is awarded in accordance with federal regulations.

University Response:

Accepted. The student's award has been corrected and the appropriate funds have been returned to the U.S. Department of Education.

Schedule of Findings and Questioned Costs

Questioned Costs: Cannot be determined

Finding 10-28 Failure to Properly Complete Required Verification Procedures

The University did not properly perform verification procedures for students at the Chicago campus.

In order to validate the accuracy of information reported by applicants for financial aid, USDE requires schools participating in federal student financial assistance programs to perform procedures to verify the accuracy of student financial and household information used to compute the expected family contribution (EFC) of each applicant. The EFC is used by the schools to determine the types and amounts of federal student financial aid each student is eligible to receive. USDE selects students for verification and schools are required to establish and follow a verification policy that complies with the federal regulations.

The University verifies the Institutional Student Information Records (ISIR) for all students selected by the USDE central processor at its Urbana and Springfield campuses and operates a quality assurance program at its Chicago campus. As such, the financial aid system has been designed to place a hold flag on the student awards for all students selected by the central processor for verification at the Urbana and Springfield campuses and for students meeting the verification selection criteria established by the University at the Chicago campus. The hold flag prevents disbursement of financial aid awards until the flag is manually removed by a financial aid counselor upon completion of the verification procedures.

During our testwork over 50 students selected for verification (25 from Urbana and 25 from Chicago), we noted the Institutional Student Information Record (ISIR) for one Chicago student reported untaxed income that was not verified by the University. Specifically, the ISIR reported untaxed income of \$43,455 which if excluded would have reduced the student's expected family contribution by \$10,548.

During the year ended June 30, 2010, there were 9,235 students subject to verification procedures at all three of the University's campuses.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

An institution shall require each applicant whose application is selected to verify items specified in 34 CFR section 668.56. The institution shall also require applicants to verify any information used to calculate expected family contribution (EFC) it has reason to believe is inaccurate.

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include establishing procedures to ensure required documentation used to verify student information is obtained and evaluated prior to disbursement of Title IV funds. Additionally, corrections should be made as required by federal regulations and documentation of the performance of verification procedures should be maintained in the student's financial aid file.

In discussing these conditions with University officials, they stated the cause was human error.

Failure to properly perform verification procedures in accordance with federal regulations may result in students receiving awards for which they are not eligible which would results in unallowable costs or may result in students not receiving awards that they may be entitled to receive. (Finding Code 10-28, 09-25)

Recommendation:

We recommend the University implement additional procedures to ensure adequate supporting documentation is obtained and evaluated by financial aid counselors prior to disbursing federal funds to students selected for verification.

University Response:

Accepted. The student's FAFSA has been corrected. However, as the student was a Professional student their award did not change as a result of the FAFSA being updated.

Finding 10-29 <u>Inaccurate and Untimely Reporting of Student Status Changes</u>

The University did not submit changes in the enrollment status of borrowers under the Federal Direct Loan (Direct Loan) program within required timeframes.

The University is required to report changes in a student's enrollment status to the National Student Loan Data System (NSLDS) on a periodic basis to ensure student borrowers of the Direct Loan programs begin repaying their federal loans in a timely manner. During our testwork over 65 borrowers (25 from the Urbana campus, 25 from the Chicago campus, and 15 from the Springfield campus) under the Direct Loan program that graduated, withdrew, or dropped out during the fiscal year, we noted the following:

- Six status changes for withdrawn students at the Urbana campus were inaccurately reported to National Student Loan Data System (NSLDS) as full-time (F), half-time (H), or less than half-time (H) status rather than as withdrawn (W) status. Upon further review, we noted these items relate to students who have dropped out and it is the Urbana campus' practice to report unofficial withdrawals (students who drop out) in the first reporting period in the following semester after they confirm the student does not enroll.
- Four status changes for withdrawn students at the Chicago campus were inaccurately reported to NSLDS as full-time (F), half-time (H), or less than half-time (H) status rather than as withdrawn (W) status. Upon further review, we noted these items were an oversight by the University.
- Two status changes for withdrawn students at the Chicago campus were never reported to NSLDS. Upon further review, we noted these status changes were not reported due to the fact the Registrar's Office did not have social security numbers on file for these students and did not obtain them from the Financial Aid Office.
- Two status change for withdrawn students at the Springfield campus were inaccurately reported to NSLDS as full-time (F), half-time (H), or less than half-time (H) status rather than as withdrawn (W) status. Upon further review, we noted these items pertain to students who withdrew or dropped out in the Spring and Summer semesters and it is the Springfield campus' policy to report withdrawals in the first reporting period in the following semester after they confirm the student does not enroll.
- One status change for a withdrawn student at the Springfield campus was never reported to NSLDS. Upon further review, we noted this status change was not reported due to the fact the student transferred to the University and withdrew from the University in the same semester; however, reporting was required since the student received a disbursement of loan funds while enrolled at the University.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

• Two status changes for withdrawn students were not reported to NSLDS within the required timeframes. Delays in reporting these status changes were 61 and 129 days.

The University disbursed loans totaling \$448,883,775 to borrowers (\$219,488,272 at the Urbana campus, \$207,873,050 at the Chicago campus, and \$21,522,453 at the Springfield campus) under the Direct Loan program during the year ended June 30, 2010.

According to 34 CFR 685.309, the University is required to notify the NSLDS of changes in a student borrower's status within 30 days of discovering the change, unless the University expects to complete its next Roster File within 60 days. In addition, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations,* requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure student status changes are accurately reported in a timely manner.

In discussing these conditions with University officials, they stated the Office of Records and Registration reports enrollment status information for the campus. During fiscal year 2010, University policy did not allow administrative withdrawals without student's request.

Failure to accurately report student status changes to NSLDS in a timely manner may result in Direct Loan borrowers not entering repayment status at the appropriate time. (Finding Code 10-29, 09-27)

Recommendation:

We recommend the University implement procedures to ensure submissions to NSLDS are accurately reported within the required timeframe for all Direct Loan borrowers.

University Response:

UIUC Response

Accepted. After being notified in Spring 2010 that this was a FY09 audit finding, the Urbana campus updated procedures to ensure all changes of enrollment are reported to NSLDS within the required timeframe. Students identified in this year's finding withdrew in Fall 2009 before the Urbana campus was made aware of the FY09 audit finding.

UIC Response

Accepted.

UIS Response

Accepted. The Offices of the Registrar reports enrollment status information to the National Student Clearinghouse based upon the official University records and their student transcripts. University policy does not

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

allow administrative withdrawals without student request. This same data is then moved by the National Student Clearinghouse to NSLDS. The students in question were students determined to be "unofficial withdrawals".

We have had procedures already established to identify students who had "unofficially withdrawn" and have now updated those procedures to directly submit the unofficial withdrawal dates to NSLDS. The reporting of unofficial withdrawal dates to NSLDS began at the end of Summer Semester 2010 for the Springfield campus.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Federal Agency: US Department of Education (USDE)

US Department of Health and Human Services (USDHHS)

Program Name: Student Financial Assistance Cluster

Questioned Costs: None

Finding 10-30 Failure to Obtain Written Agreements with Third Party Institutions

The University did not obtain written agreements for all third party institutions as required by federal regulations.

The University has several arrangements whereby portions of the University's academic programs are provided by other institutions of higher education. Such arrangements primarily consist of foreign exchange programs operated by the University. During our testwork over 51 students (25 from Urbana, 25 from Chicago, and one from Springfield) participating in study abroad programs, we noted written agreements were not available for five institutions attended by students from the Urbana campus.

According to Volume 2 Chapter 7 of the 2009-2010 Federal Student Aid Handbook, a study abroad program must be part of a written contractual or consortium agreement between two or more schools. In addition, OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include ensuring written agreements are obtained when required.

In discussing these conditions with University officials, they stated the University interpreted the federal codes as not requiring written agreements with third party institutions when financial aid is disbursed directly to a student who remains fully enrolled at the University for resident credit toward graduation, and who participates on a university sponsored study abroad program. The University does not disburse any federal financial aid funds to host institutions.

Failure to obtain required written agreements with all third party institutions with which the University offers educational programs may result in student financial aid recipients participating in programs with ineligible institutions. (Finding Code 10-30, 09-28)

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Recommendation:

We recommend the University verify written agreements are in place for all third party institutions as required by federal regulations.

University Response:

Accepted. The Urbana campus is implementing procedures to ensure that written agreements are in place for all third party institutions.

Finding 10-31 Inadequate Controls Over Federal Expenditures Paid with Procurement Cards

The University has not established adequate internal controls over federal expenditures made with procurement cards

The University operates a procurement card program which allows individuals throughout the University to make smaller purchases (defined as less than \$4,999) on a credit card which is directly reimbursed by the University on a monthly basis. The University's policies require individuals assigned a procurement card to sign an agreement stipulating they will use the card in accordance with University policy. This agreement is also required to be authorized by the individual's supervisor or the department head. The University's policies require transactions incurred on the procurement card to be approved in the University's procurement card system by the individual cardholder and an assigned reviewer. Although the University has established policies and procedures for issuing procurement cards, incurring and paying for expenditures with procurement cards, and reviewing and approving of procurement card transactions, we noted these policies and procedures were not properly designed to prevent erroneous charges from being paid by the University and were not followed consistently by University personnel.

Specifically, we noted the procurement card system is configured to automatically record transactions in the general ledger to pre-assigned accounts, including federally funded accounts (auto-reconciled) if the cardholder and/or assigned reviewer have not approved the respective transactions within seven days. The configuration of the system is inconsistent with the University policy that requires both the cardholder and reviewer to approve all procurement card transactions. We noted there are 529 federally funded accounts which have been established as

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

default accounts for procurement cards. The federal expenditures paid with procurement cards for these default accounts were \$3,675,696 during the year ended June 30, 2010.

OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations*, requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure procurement card transactions are appropriately reviewed and approved to avoid erroneous or duplicate transactions from being paid and recorded.

In discussing these conditions with University officials, they stated that best business practice would be to not allow a grant fund to be the default fund for P-Card transactions.

Failure to properly review and approve procurement card transactions could result in unallowable costs being charged to the University's federal programs. (Finding Code 10-31, 09-31)

Recommendation:

We recommend the University revise the system configuration to eliminate the auto reconciliation of procurement cards to federally funded accounts.

University Response:

Accepted. The University notes there were no exceptions found with transactions charged to grant funds used as the default for Procurement Cards; however, the University agrees best business practice would be to not allow grant funds to be established as the default fund for these cards except for specific, pre-approved exceptions.

The auto reconciliation feature of the procurement card system was inactivated in July 2010.

Finding 10-32 *Untimely Submission of Financial Reports*

The University does not have a process in place to ensure financial reports are prepared and submitted within required timeframes.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

The University is required to prepare various periodic financial reports relative to awards under the Research and Development Cluster. These reports are required to be prepared at various timeframes based upon the terms and conditions of the awards. The University is also required to prepare quarterly financial reports for the Supplemental Nutrition Assistance Program (SNAP) and Maternal and Child Health Services Block Grant to the States (MCH Block Grant) program. During our testwork over the financial reports required to be submitted during fiscal year 2010, we noted the following:

- Two quarterly reports and three annual reports at the Urbana campus and one quarterly reports at the Chicago campus (out of 52 tested) related to the Research and Development Cluster were not submitted by the reporting deadline. Delays in the submission of these reports ranged from 5 to 57 days.
- Two reports at the Urbana campus (out of 2 tested) related to the Supplemental Nutrition Assistance Program were not submitted by the reporting deadline. Delays in the submission of these reports ranged from 9 to 10 days.
- One report at the Chicago campus (out of 2 tested) related to the Maternal and Child Health Services Block Grant to the States program was not submitted by the reporting deadline. The delay in the submission of this report was 9 days.

In addition, we noted the University does not have consistent procedures for tracking the due dates and submission of all federal reports. Currently, reporting responsibilities are assigned to different sections within the University's Grant and Contracts Offices based upon the federal awarding agency. The individuals within each reporting section have developed a variety of formal and informal methods for tracking and reporting requirements and deadlines. As a result, the University does not have the ability to monitor whether reports are prepared and submitted in a timely manner.

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110) and the grant agreements, contracts, and other award documents for the major programs identified above, require the University to prepare periodic financial reports. The instructions for the financial reports require quarterly and semi-annual reports to be submitted within 30 days of period end and annual reports to be submitted within 90 days of period end. Per Administrative Code Title 77 Part 630.20, billings for the Maternal and Child Health Services Block Grant to the States program must be submitted within 30 days after the end of the reporting period. Additionally, OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure financial reports are submitted within required timeframes.

In discussing these conditions with University officials, they stated the Research and Development Cluster reports submitted late were a result of human error. The University does not consider the reports submitted for the Supplemental Nutrition Assistance Program and Maternal and Child Health Services Block Grant to the States program to be late because these reports are billing requests which the University believes it has discretion to submit after prescribed deadlines.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Failure to prepare reports in a timely manner inhibits the ability of the federal agencies and pass through entities to properly monitor and evaluate the performance of the programs. (Finding Code 10-32)

Recommendation:

We recommend the University implement procedures to ensure all financial reports are submitted within the established deadlines. We also recommend the University implement standardized procedures to monitor reporting requirements and submissions.

University Response:

Accepted. The University continues efforts to ensure reports are submitted on a timely basis. We agree that some reports were delayed in submission; however, not all reports cited above were submitted past the deadline and note the following:

Bullet 1

The two quarterly reports and three annual report at the Urbana campus were submitted late. Refresher training has been provided to emphasize the importance of timely submission of reports.

The original quarterly report at the Chicago campus was submitted using SF form 272 on April 26, 2010, prior to the April 30, 2010 report submission due date. The University was subsequently notified by the sponsor on May 13 that SF form 272 was no longer being accepted. The sponsor requested that the report be resubmitted using SF form 425 within 15 days of the notice. The University complied with this request and resubmitted the financial report using form SF 425 on May 19, within the allowed time frame for sponsor's request for resubmission. The University was compliant in meeting the financial reporting deadlines for both the original report submission and the resubmission as requested by the sponsor.

Bullet 2

The University does not agree that two reports at the Urbana campus related to the Supplemental Nutrition Assistance Program (SNAP) were submitted to the Illinois Department of Human Services (IDHS) past the reporting deadlines. The SNAP program does not have a 20-day reporting deadline (unlike the Emergency Food and Shelter, Tax Write-In and Supportive Housing providers). The SNAP program requires the submission of complex, specialized quarterly reports and the University works closely with IDHS on coordinating a timely submission of reports that meet the sponsor's needs and requirements. The University received written confirmation from IDHS that the 20-day report deadline the auditing firm applied in their test work is not applicable to the SNAP program. This written confirmation from IDHS supporting the reports were filed in a timely manner was provided to the auditing firm on January 18, 2011 during the University's review of the preliminary audit findings.

116

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Bullet 3

The University will ensure that all financial reports for MCH will be submitted within the deadline.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Federal Agency: US Department of Health and Human Services (USDHHS)

Program Name: Temporary Assistance for Needy Families Cluster

CFDA # and Program Expenditures: 93.558 (\$5,924,398)

Award Numbers: 2010 81X6957000

Questioned Costs: None

Finding 10-33 <u>Inadequate Support for Cash Draw</u>

The University did not have accounting records to support reimbursement requests for the Temporary Assistance for Needy Families Cluster (TANF) program.

The University draws cash for administrative expenditures and scholarship expenditures related to the TANF program on the reimbursement basis. The University's procedures for calculating reimbursement based draws generally are based upon expenditures paid and reported in the general ledger. During our testwork over three cash draws performed by the Springfield campus for the TANF program, we noted the University requested reimbursement of amounts in excess of expenditures reported in the general ledger as follows:

- Administrative draws totaling \$29,082 were requested during the year ended June 30, 2010 while only \$1,900 of expenditures were reported in the accounting records as of that date. As a result, the University appeared to have been overdrawn by \$27,812 at year end.
- Scholarship draws totaling \$93,142 were requested through October 31, 2010 while only \$84,208 of scholarship expenditures were reported in the accounting records as of that date. As a result, the University appeared to have been overdrawn by \$8,935.

Upon further investigation of these differences, we noted there is a lag between the time expenditures are incurred and when they are reported in the general ledger due to the decentralized nature of the scholarship programs operations in the Financial Aid Offices.

OMB Circular A-110, *Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations* (OMB Circular A-110), requires the University to minimize the time elapsing between the transfer of funds from the federal government and the payment of program expenditures. OMB Circular A-110 also requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include procedures to ensure reimbursement requests are properly supported by the University's accounting records.

In discussing these conditions with University officials, they stated the Grants and Contracts Office relies on the Financial Aid Office to provide expenditure information for the administrative and scholarship expenditures. This information was provided either at the end of each semester or near the end of the fiscal year when they were sure the total amount billed was correct.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

Drawing federal funds based upon information other than the University's official accounting records may result in funds being drawn in advance of the University's immediate cash needs. (Finding Code 10-33)

Recommendation:

We recommend the University implement procedures to ensure expenditures are recorded in the general ledger as they are incurred to ensure the reimbursement requests are adequately supported by the University's official accounting records.

University Response:

Accepted. The University agrees that two draws included reimbursements for administrative expenditures at the Springfield campus that were not supported by accounting records at the time of the draw. The University also agrees that one cash draw included reimbursement for scholarship expenditures at the Chicago campus that was not supported by accounting records at the time of the draw. The University will refine and document procedures to ensure expenditures are appropriately recorded in the accounting system before they are billed to the sponsor. The staff at the Springfield campus will be advised of the updated procedures.

Questioned Costs: None

Finding 10-34 Inadequate Cash Draw and Reimbursement Request Controls

There is no documentation to substantiate that a formal review and approval of cash draw and reimbursement request calculations are performed.

The University uses several different methods to calculate the amount for its cash draws and reimbursement requests based upon the specific funding methods permissible under each of its federal programs. The cash draw and reimbursement request calculations for each program are prepared by staff in the Grants and Contracts Office based upon queries of expenditure information reported in the University's general ledger; however, there was no documented supervisory review of the cash draw and reimbursement request calculations prior to University personnel requesting cash from the federal government.

OMB Circular A-110, Uniform Administrative Requirements for Grant and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations (OMB Circular A-110) requires nonfederal entities receiving federal awards establish and maintain internal control designed to reasonably ensure

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – Federal Compliance

compliance with federal laws, regulations, and program compliance requirements. Effective internal controls should include a supervisory review of all cash draw and reimbursement request calculations prior to requesting funds from a federal agency.

In discussing these conditions with University officials, they stated there are adequate controls in place for all letter of credit cash draws and reimbursement method billings.

Failure to perform supervisory reviews of cash draw and reimbursement request calculations may result in unapproved and inaccurate cash draw and reimbursement request calculations leading to noncompliance with cash management regulations. (Finding Code 10-34, 09-33)

Recommendation:

We recommend the University implement procedures to ensure cash draw and reimbursement request calculations are reviewed and approved prior to requesting funds from the federal government.

University Response:

Not Accepted. This is a repeat finding from FY09. The Department of Health and Human Services (HHS) in coordination with the Department of Education and the National Science Foundation, issued on February 14, 2011, a Management Decision Letter (MDL). According to the MDL, "The audit finding is not sustained based on our review."

The University subsequently received a letter on March 10, 2011, from HHS that states "The purpose of this communication is not to reverse our decision(s) but to clarify the nature of the finding and the direction that the University needs to take in correction of the issue(s)". The University will seek further guidance from HHS.

Auditors' Comment:

We believe effective internal control should include a documented review and approval of cash draw calculations and we were unable to obtain evidence that the information included on the shared drive had been reviewed and approved by an individual other than the preparer.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-35 – Contracts and Real Estate Leases Not Properly Executed

The University has not established adequate internal controls over contracts and leases to ensure they contain all necessary provisions, are properly executed prior to performance, and are filed with the State of Illinois, Office of the Comptroller on a timely basis.

During our review of 60 contracts executed during the year ended June 30, 2010, we noted the following:

- 56 contracts did not contain the signature of the employee signing on behalf of the University Comptroller.
- 15 contracts were executed subsequent to performance of the contract. The contract execution dates ranged from one day to 717 days after the beginning of the contract start date.
- Two contracts were not published in the Illinois Procurement Bulletin.
- 23 contracts did not include the federal identification number for the vendor.
- Two contracts did not include any of the required certifications.
- Two contracts did not include the Illinois Use Tax Certification.
- One contract did not include the State Board of Elections Certification.
- One contract did not include the Access and Right to Audit Certification.
- Twelve contracts were not filed timely with the Office of the Comptroller. The late filings ranged from one day to 60 days late.

During our review of 25 real estate leases executed during the year ended June 30, 2010, we noted the following:

- 12 leases were executed after the lease term began. The lease execution dates ranged from seven days to 205 days after the beginning of the lease term.
- 12 leases did not include the federal identification number for the lessor.
- One lease did not include the Environmental Protection Act Clause certification.
- One lease did not include a completed, signed and notarized Real Estate Disclosure form, executed prior to the lease execution date.
- Six leases did not include the Drug Free Workplace Certification.
- One real estate lease was not filed timely with the Office of the Comptroller. The late filing was 16 days late.

The Illinois Procurement Code (30 ILCS 500 et seq.) and Statewide Accounting Management System (Procedures 15.20 et seq. and 15.10.40) requires contracts and real estate leases to contain certain signatures, clauses, and certifications and also require State agencies to file contracts for professional and artistic services exceeding \$5,000 and all other contracts and leases exceeding \$10,000 with the State Comptroller within 15 calendar days after execution. In addition, the University of Illinois Business and Financial Policies and Procedures (Section 2.3) and good business practices require all contracts and leases to be fully executed prior to the beginning of the lease term or the commencement of services. Additionally, the Fiscal Control and Internal Auditing Act (30 ILCS 10/3001), requires the University to establish and maintain a system, or systems, of

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

internal fiscal and administrative controls, which shall provide assurance that: (1) resources are utilized efficiently, effectively, and in compliance with applicable law; (2) obligations and costs are in compliance with applicable law; (3) funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation; (4) revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and (5) funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist. The University's system of internal controls should include procedures to ensure contracts and leases contain all necessary provisions and are properly executed prior to the performance.

In discussing these conditions with University officials, they stated exceptions can be attributed to changes in requirements for documents, human error, and documents not being received in the Contract Records Office in a timely manner.

Failure to fully execute a contract or real estate lease prior to the commencement of services or lease term leaves the University vulnerable to unnecessary liabilities and potential legal issues. In addition, failure to include all appropriate signatures, clauses, and certifications in contracts and leases or file contracts and real estate leases with the Office of the Comptroller on a timely basis results in not compliance with State statutes and regulations. (Finding Code 10-35, 09-35, 08-09, 07-10, 06-07, 05-05, 04-05, 03-06)

Recommendation

We recommend that the University establish appropriate procedures to ensure all contracts and leases are completed, approved, and executed prior to the start of the services and lease term. Further, the University should review procedures to ensure all appropriate signatures, clauses, and certifications are obtained prior to execution for all contracts and lease agreements and all applicable contracts and real estate leases are filed with the Office of the Comptroller in accordance with State statutes and related guidelines.

University Response

Accepted. The University will continue to examine and improve procedures to ensure contracts and leases are properly approved and executed prior to the start of the services and lease terms, that appropriate clauses and certifications are obtained in advance of execution, and that all applicable contracts and real estate leases are filed with the Office of the Comptroller per State statutes and related guidelines.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-36 – Inadequate Controls over Patient Billing System

(This finding was previously reported in the University of Illinois Health Services Facilities System *Government Auditing Standards* report released on January 12, 2011)

The University has not established adequate internal controls over access to the patient billing system used in its financial reporting process.

The University uses a subsidiary system to record and bill patient care transactions at the Medical Center. Information generated from the patient billing system is used to record patient accounts receivable and the related revenue in the general ledger and to estimate the allowance for doubtful patient accounts receivable. Patient health information is also captured in the system.

During our audit, we noted access is granted to users of the patient billing system based upon the written approval of the individual's supervisor. The supervisor is responsible for verifying that the access granted is appropriate based upon the employee's job responsibilities when the access is initially granted; however, procedures have not been developed to monitor access for approximately 350 users on a continuing basis. In addition, we noted the following deficiencies related to user access rights to the patient billing system:

- There is one new user (out of a total of 15 new users) whose access to the patient billing system was not properly authorized.
- There are three users (out of a total of 24 users) with access to post charges to patient accounts whose access rights were not appropriate based upon review of each user's job functions.

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001), requires the University to establish and maintain a system, or systems, of internal fiscal and administrative controls, which shall provide assurance that: (1) resources are utilized efficiently, effectively, and in compliance with applicable law; (2) obligations and costs are in compliance with applicable law; (3) funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation; (4) revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and (5) funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist. The University's system of internal controls should include procedures to monitor the appropriateness of access levels on a continuing basis. In addition, generally accepted information technology guidance endorses the development of well-designed and well-managed controls to protect computer systems and data. Effective computer security controls provide for safeguarding, securing, and controlling access to systems, properly segregating incompatible duties, protecting against misappropriation, and properly effecting and documenting changes made to information systems.

In discussing these conditions with University personnel, they stated that a new policy and procedure was developed for conducting formal reviews of user access to the HealthQuest system on an annual basis. This new policy and procedure was instituted in May 2010, soon after the completion of the fiscal 2009 audit. However, the initial annual review under the new policy did not commence until July 2010 (early fiscal year 2011). The

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

timing of this initial review contributed to the Medical Center not identifying these exceptions within fiscal year 2010.

Failure to properly monitor user access rights may result in unauthorized, erroneous, or fraudulent transactions being recorded in the patient billing system. (Finding Code 10-36, 09-38)

Recommendation

We recommend the University implement procedures to perform formal reviews of user access rights on a periodic basis to help ensure that the access rights granted to each user are appropriate based on their current job responsibilities and that the planned level of segregation of duties is achieved on a continuing basis.

University Response

Accepted. The Medical Center will complete the necessary corrective action to address the recommendation in this finding.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-37 – Failure to Follow Time Reporting Requirements

The University does not require all employees to submit time sheets as required by the State Officials and Employees Ethics Act.

During our testing of payroll, we selected 60 employees across all three campuses and noted that 53 employees did not file timesheets as required by the State Officials and Employees Ethics Act. Of these 53 employees, 20 began filing timesheets in September 2009, 25 began filing timesheets in January 2010, and eight did not file any timesheets. Based upon inquiry of University management, employees classified as board members and faculty continue to generally track their time using a "negative" timekeeping system whereby the employee is assumed to be working unless noted otherwise.

The State Officials and Employees Ethics Act (the Act) (5 ILCS 430/1-5) defines "State agency" to include "public institutions of higher learning..." and defines "State employee" to be "any employee of a State agency." The Act required the Illinois Board of Higher Education (IBHE), with respect to State employees of public universities, to adopt and implement personnel policies. The Act (5 ILCS 430/5-5(c)) also states, "The policies shall require State employees to periodically submit time sheets documenting the time spent each day on official State business to the nearest quarter hour; contractual State employees may satisfy the time sheets requirement by complying with the terms of their contract, which shall provide for a means of compliance with this requirement." The IBHE adopted personnel policies for public universities on February 3, 2004 in accordance with the Act. The University has not incorporated these policies into the University's policies.

In discussing these conditions with University officials, they stated the implementation of the system for positive time reporting for University Academic Professionals and Exempt Civil Service staff began September 2009 (for UIUC and UIS) and continued to be rolled out through January 2010 (for UIC). All Non-Exempt Civil Service throughout the University have been reporting time in accordance with the State University Civil Service System and all faculty report time not worked.

Failure to follow the time reporting requirements of the Act results in noncompliance with State statute. (Finding Code 10-37, 09-40, 08-11, 07-11, 06-06, 05-06)

Recommendation

We recommend the University implement procedures to ensure all employees submit time sheets as required by the Act.

University Response

Accepted. The University will continue to implement the plan initiated in November 2008 to ensure compliance across all three campuses.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-38 – Inaccurate Inventory Records

The University does not have an adequate process to measure inventory balances as of fiscal year-end (i.e. balance sheet date).

The University performs annual physical inventory counts for large balances of goods and supplies held on hand, such as University bookstore books and merchandise, hospital supplies, medical center pharmaceuticals, and general office supplies. The results of these physical inventory counts are used to record inventory balances so that amounts reported at year-end are based on actual quantities on hand as of the balance sheet date. During our testwork over physical inventory counts at the Materials Management department of the University of Illinois Hospital, we selected a sample of 80 inventory items (totaling \$305,276) that were counted at year-end and performed test counts. During that testwork, we noted the following:

- Eight items (totaling \$18,142) did not agree with the department's inventory records resulting in understatements totaling \$5,939.
- Three items (totaling \$3,323) did not agree with the department's inventory records resulting in overstatements totaling \$7,620.

Inventory balances of goods and supplies held on hand by the Materials Management department of the University of Illinois Hospital totaled \$2,485,000 as of the year ended June 30, 2010.

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001), requires the University to establish and maintain a system or systems of internal fiscal and administrative controls, which shall provide assurance that revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources. Effective internal controls should include a process of performing accurate physical inventory counts so that amounts reported at year-end are based on actual quantities on hand as of the balance sheet date.

In discussing these conditions with University officials, they stated the differences were due to data entry errors.

Failure to perform accurate physical inventory counts of actual on quantities on hand at year-end results in inventory balances being inaccurately reported in the University's financial statements at year-end. (Finding Code 10-38)

Recommendation

We recommend the University review its process for performing physical inventory counts and consider any changes necessary to ensure physical inventory counts are accurate and amounts reported at year-end are based on actual quantities on hand as of the balance sheet date.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

University Response

Accepted. The University of Illinois Hospital will revise procedures to address the recommendation in this finding.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-39 – Untimely Bank Account Reconciliation Supervisory Reviews

The University did not perform supervisory reviews over bank account reconciliations in a timely manner during the fiscal year.

During our testwork, we noted a supervisory review was not performed over the December 2009 bank account reconciliations prepared for 13 nonoperating departmental bank accounts until June 2010. Upon further review, we noted the bank reconciliations for these accounts were also not reviewed by a supervisor until June 2010 for the months of January, February, March, and April 2010.

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001), requires the University to establish and maintain a system, or systems, of internal fiscal and administrative controls, which shall provide assurance that: (1) resources are utilized efficiently, effectively, and in compliance with applicable law; (2) obligations and costs are in compliance with applicable law; (3) funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation; (4) revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and (5) funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist. The University's system of internal controls should include procedures to ensure bank account reconciliation supervisory reviews are completed in a timely manner.

In discussing these conditions with University personnel, they stated six of the reconciliations were typically reconciled by a staff member that was absent for an extended period of time due to illness. Additional causes included heavy staff workload and competing priorities.

Failure to perform supervisory reviews of bank account reconciliations in a timely manner could result in bank account discrepancies not being properly identified and investigated timely. (Finding Code 10-39)

Recommendation:

We recommend the University establish procedures to ensure all bank account reconciliations are performed in a timely manner.

University Response:

Accepted. The University has changed their procedures to address the recommendation in this audit finding.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-40 – Failure to Maintain Supporting Documentation for Agency Workforce Report

The University did not maintain adequate supporting documentation for the workforce data included in the Agency Workforce Report.

The Agency Workforce Report is submitted annually to the Governor's Office and Secretary of State as part of the State Employment Records Act. The report is designed to provide data for the calendar year relative to: (1) the number and income levels of University employees, (2) the number of employees by gender, and (3) the number of employees by minority group. The University generates the report directly from the Enterprise Data Warehouse which contains employee level data. During our review of the Agency Workforce Report submitted during the year, we noted the University created the report based on a query of the Enterprise Data Warehouse run on a specific date. Because they did not maintain the detail of individuals from that query, we were unable to verify the accuracy of the report.

The State Employment Records Act (5 ILCS 410/20) requires the University to collect, classify, maintain, and report all information required by this Act to the Governor's Office and Secretary of State annually. In addition, the Fiscal Control and Internal Auditing Act (30 ILCS 10/3001) requires the University to maintain a system of fiscal and administrative controls. Effective internal controls should include maintaining adequate supporting documentation for all reports submitted to the Governor's Office and the Secretary of State.

In discussing these conditions with University officials, they stated the report is a point-in-time report. The original query was not saved.

Failure to maintain supporting documentation inhibits the ability to perform an audit of the report and could result in inaccurate data being included in the annual report. (Finding Code 10-40, 09-44)

Recommendation

We recommend the University implement procedures to ensure adequate supporting documentation is maintained for the Agency Workforce Report.

University Response

Accepted. As of December 7, 2010, the University made procedural changes to adequately maintain supporting documentation for the Agency Workforce Report.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-41 – Use and Maintenance of University Vehicles

The University did not report certain automobile accidents involving University vehicles to the Department of Central Management Services in a timely manner and did not properly maintain all University motor vehicles.

During our testing of the operation of University vehicles, we noted the following exceptions:

- The University reported 154 accidents involving University vehicles to the Department of Central Management Services (CMS) during fiscal year 2010. Of the 124 accidents reported by the Urbana Campus, 71 (57%) were not reported timely and ranged from one to 61 days late. Of the 30 accidents reported by the Chicago Campus, 13 (43%) were not reported timely and ranged from one to 76 days late.
- Of the 40 University vehicles selected for maintenance documentation testing, four (10%) of the vehicles did not have regular oil changes. University records show these vehicles were driven approximately one to nine years and approximately 4,566 to 78,893 miles without an oil change.

The Illinois Administrative Code (Title 44, Subtitle D, Chapter 1, Part 5040.520) states a driver of a state-owned or leased vehicle which is involved in an accident of any type shall report such accident to the appropriate law enforcement agency and to CMS by completing the "Motorist's Report of Illinois Motor Vehicle Accident" form (SR-1). For all accidents, the Form SR-1 is to be completed as soon as possible and submitted to the office of the current insurance carrier. In no case is this report to be completed later than three (3) days following an accident.

Additionally, University of Illinois Office of Business and Financial Services Policies and Procedures (Section 15.3) state that the responsible personnel at each campus "must deliver the accident report to the CMS within seven calendar days of the accident in all cases." Finally, the Illinois Administrative Code (Title 44, Subtitle D, Chapter 1, Part 5040.400) states that all state-owned vehicles shall undergo regular service in order to maintain the vehicles in road worthy, safe, operating condition and appropriate cosmetic condition and the driver should check oil, coolant, and battery water levels regularly.

In discussing these conditions with University officials, they stated these exceptions are due to 1) the campus offices not knowing about reportable accidents until the units report them, after which time is needed to gather the information required by CMS and 2) misunderstanding by employees as well as their supervisors due to their unfamiliarity with University policy.

Failure to report automobile accidents to the Department of Central Management Services in a timely manner may cause the University to be denied coverage and result in additional liabilities for the University. Failure to perform regular maintenance on University vehicles could result in more significant expenditures related to the repair or replacement of the vehicles. (Finding Code 10-41, 09-46, 08-10)

Recommendation

We recommend the University implement procedures to ensure that accident reports are submitted to the Department of Central Management Services in a timely manner. We also recommend the University ensure that policies and procedures are clearly understood and followed by all personnel responsible for the oversight of University vehicles within each department.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

University Response

Accepted. The University continues to disseminate information and helpful educational tools to ensure employees know to promptly report auto accidents. University policies were modified to include an example of how to properly complete the accident report (SR-1). In addition, the University will continue to work to ensure personnel responsible for the oversight of University vehicles clearly understand and follow required procedures.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-42 – Failure to Follow State Regulations for Recording Equipment

The University improperly records equipment additions by reducing the purchase price for the value of trade-ins. Additionally, the University does not calculate a gain or loss on disposal of equipment from trade-ins.

During our testwork over equipment additions, we noted the University improperly records the equipment additions based on the purchase price paid in cash, plus the net book value of any assets used for trade-in, less any trade-in allowances received from the seller. The University does not calculate a gain or loss on disposal of equipment from trade-ins. However, the University should record the equipment additions based on the cost, excluding any trade-in value received, and calculate a gain or loss on equipment traded-in based on the difference between its net book value and the trade-in value received.

Specifically, during our testwork over forty equipment additions (totaling \$10,266,902) recorded during the fiscal year, we noted one equipment addition should have been recorded at \$2,258,000, the gross purchase price of the equipment. However, the equipment was improperly valued at \$1,958,000, net of a \$300,000 trade-in allowance received for an asset with a net book value of \$0 (i.e. fully depreciated). Additionally, the University should have recorded a gain on disposal of \$300,000 from the trade-in.

Equipment additions totaled \$120,733,000 during the year ended June 30, 2010.

In accordance with the Illinois Administrative Code (Title 44, Subtitle D, Chapter 1, Part 5010.240(e)(2)), "If equipment is acquired by trade-in, the value of any items traded in shall not be used to reduce the purchase price" of the asset purchased.

In discussing these conditions with University officials, they stated their established process has been to record asset purchases involving a trade-in as the sum of the cash paid and the net book value of the trade-in asset given up, a process believed to be consistent with generally accepted accounting principles.

Failure to record equipment at cost results in the inaccurate reporting of capital assets. (Finding Code 10-42, 09-47)

Recommendation:

We recommend that the University revise its procedures for recording capital assets to ensure equipment is recorded at cost.

University Response:

Accepted. The University has changed their procedures to address the recommendation in this finding and to be in compliance with the Illinois Administrative Code.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

Finding 10-43 – Failure to Report Payroll Warrant Information

The University did not report payroll warrant information to the Office of Secretary of State as required by State Statute.

During our testwork, we noted the University drew and paid 593,557 payroll warrants during the year ended June 30, 2010. However, the University has not reported this information to the Office of Secretary of State as of the date of our testing.

To comply with the State Employment Records Act, on an annual basis the Office of the Comptroller accumulates and reports the total number of payroll warrants drawn for the payment of salaries for State employees to facilitate an accurate compilation of the entire State workforce. To facilitate the reporting of this information, the University is required to report specific information about the number of payroll warrants it issues to the Office of the Secretary of State. During our audit, we noted the University does not have any procedures in place to ensure the applicable payroll warrant information is reported to the Office of Secretary of State. Further, the University did not file any of the applicable payroll warrant information during the year.

The State Comptroller Act (15 ILCS 405/13.1) states that the total number of payroll warrants drawn by the Board of Trustees of the University of Illinois and paid from funds retained in its own treasury shall be filed with the Office of the Secretary of State. Additionally, the Fiscal Control and Internal Auditing Act (30 ILCS 10/3001), requires the University to establish and maintain a system, or systems, of internal fiscal and administrative controls, which shall provide assurance that: (1) resources are utilized efficiently, effectively, and in compliance with applicable law; (2) obligations and costs are in compliance with applicable law; (3) funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation; (4) revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and (5) funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist. The University's system of internal controls should include procedures to ensure all applicable payroll warrant information be reported to the Office of Secretary of State as required.

In discussing these conditions with University personnel, they stated the University was not aware of the requirement to file with the Office of the Secretary of State a report of total number of payroll warrants drawn on funds retained in its own treasury.

Failure to report payroll warrant information to the Office of Secretary of State results in noncompliance with the State Comptroller Act. (Finding Code 10-43)

Recommendation:

We recommend the University implement procedures to report payroll warrant information to the Office of Secretary of State as required by the State Comptroller Act.

Schedule of Findings and Questioned Costs

Year ended June 30, 2010

Current Findings – State Compliance

University Response:

Accepted. The University will implement procedures to address the recommendation in this audit finding.

Prior Findings Not Repeated – Federal Compliance
Year ended June 30, 2010

A. Inadequate Semi-Annual Effort Certifications for the SNAP Program

Semi-annual effort certifications prepared for the SNAP program at the Urbana campus are not in accordance with federal regulations. (Finding Code 09-07)

In the current year, the University modified the semi-annual effort certification process to require the certifications to be signed by direct supervisors who have direct knowledge of the activities being performed by the SNAP personnel throughout the State.

B. Inability to Test Eligibility of Foreign Language Fellowship Recipients

The University was not able to provide documentation supporting eligibility determinations made for recipients of fellowships under the Foreign Language program. (Finding Code 09-11)

In the current year, the Foreign Language program was not a major program and, therefore, eligibility information was not requested from the University.

C. Inadequate Process for Preparation of Schedule of Expenditures of Federal Awards

The University did not initially include all federal grants in the schedule of expenditures of federal awards (SEFA). (Finding Code 09-12)

In the current year, the University implemented procedures to ensure all federal grants were included in the SEFA.

D. Unallowable Costs Charged to Federal Program

The University claimed expenditures that are unallowable under the Cooperative Extension Services (CES) program. (Finding Code 09-19)

In the current year, the University discontinued it practice of charging self-insurance for computers to its federal programs.

E. Inadequate Supporting Documentation for Interdepartmental Charges

Adequate supporting documentation does not exist to substantiate interdepartmental services charged to the Foreign Language and Cooperative Extension Services programs. (Finding Code 09-20)

In the current year, the University was able to provide supporting documentation for each expenditure selected for testwork.

Prior Findings Not Repeated – *Federal Compliance*Year ended June 30, 2010

F. Inaccurate Amounts Reported in Annual Financial Status Reports

The University did not accurately report indirect costs in its financial status reports submitted for the Research and Development Cluster program. (Finding Code 09-22)

In the current year, exceptions similar to those identified in the prior year finding are included in finding 10-15.

G. Inadequate Cash Management Procedures

The University does not have adequate procedures in place to ensure cash draws are properly calculated for the Cooperative Extension Services (CES) program. (Finding Code 09-23)

In the current year, the University personnel performed additional supervisory review procedures.

H. Failure to Perform Return of Fund Calculations

The University did not perform return of fund calculations as required by federal regulations. (Finding Code 09-26)

In the current year, the University modified its procedures to include students who withdraw without notification in its evaluation of students requiring return of fund calculations.

I. Inaccurate Amounts in the Fiscal Operations Report and Application to Participate

The University did not accurately report amounts in the Fiscal Operations Report and Application to Participate (FISAP) submitted for the Springfield campus. (Finding Code 09-29)

In the current year, the University personnel performed additional supervisory review procedures over the FISAP.

J. Inadequate Approval Controls for Expenditures

The University has not established approval controls over expenditures charged to its federal award that are consistently followed by all University units and departments. (Finding Code 09-32)

In the current year, the University was able to provide supporting documentation evidencing authorized approval for each expenditure selected for testwork.

Prior Findings Not Repeated – *State Compliance*Year ended June 30, 2010

K. Untimely Approval of Board Minutes

The University did not approve or make Board of Trustee meeting minutes available to the public on a timely basis. (Finding Code 09-34)

In the current year, the University drafted and submitted the meeting minutes for each meeting throughout the fiscal year to the Board of Trustees for their review and approval at the next scheduled meeting. Further, those meeting minutes were approved at the next scheduled meeting and then made available to the public.

L. Energy Resource Center – CMS Intergovernmental Agreement

The University did not have adequate controls over the administration of energy related services provided to the State and other participating governmental agencies. (Finding Code 09-36)

In the current year, the University substantially completed the process of winding down the activities associated with this contract.

M. Inadequate Process for Estimating Allowance for Doubtful Accounts Receivable

The University did not establish adequate internal controls over estimating and recording its allowance for doubtful patient accounts receivable (the allowance). (Finding Code 09-37)

In the current year, the University revised its procedures for estimating the allowance to include using historical collection experience and current payer trends to estimate the allowance and to assess the historical accuracy of its estimation process. Further, the aging analysis used to estimate the allowance was prepared based upon the date of service

N. Inadequate Process for Valuation of Alternative Investments

The University did not have an adequate established accounting and financial reporting process for determining the fair value measurements for its alternative investments. (Finding Code 09-39)

In the current year, the University revised its procedures for determining the fair value measurements of its alternative investments to include comparing the audited financial statements for the investment funds to the quarterly investment statement for the same period and independently pricing underlying investment securities. Further, the University formally compared the estimated values reported to the investment manager statements as of June 30th.

O. Inaccurate Pharmaceutical Inventory Valuation

The University did not have an adequate process to measure and value pharmaceutical inventory balances as of fiscal year-end (i.e. balance sheet date). (Finding Code 09-41)

In the current year, the University scheduled all pharmaceutical physical inventories to correspond to the University's fiscal year-end of June 30th.

Prior Findings Not Repeated – *State Compliance*Year ended June 30, 2010

P. Inaccurate Year End Revenue Accrual

The University did not accurately calculate year end catering sales revenue accruals and a supervisory review was not performed relative to this accrual. (Finding Code 09-42)

In the current year, evidence of supervisory review was documented and no exceptions were identified in our sample of revenue accruals tested.

Q. Inadequate Documentation of Capital and Operating Lease Determinations and Inaccurate Lease Schedules

The University did not consistently follow established controls relative to documenting their determination of whether lease transactions should be classified as capital or operating. In addition, the University's lease schedules used in reporting prior year interest accruals were inaccurate. (Finding Code 09-43)

In the current year, the University documented their determination of whether lease transactions should be classified as capital or operating for our sample tested. In addition, no exceptions were identified in our testing of the University's lease schedules used to report current year interest accruals.

R. Contracts and Real Estate Leases Not Filed Timely

The University did not file contracts and real estate leases with the State of Illinois, Office of the Comptroller and Secretary of State on a timely basis. (Finding Code 09-45)

In the current year, similar exceptions related to the filing leases with the Office of the Comptroller have been reported in finding 10-35.

Financial Related Information Summary

Year ended June 30, 2010

Financial related information presented in this section of the report includes the following:

- Financial Related Schedules:
- Schedule of Expenditures of Federal Awards
- Attachments to Schedule of Expenditures of Federal Awards
- Notes to the Schedule of Expenditures of Federal Awards

The Schedule of Expenditures of Federal Awards presented in this section has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in the auditors' opinion, it is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

The findings and auditors' reports on compliance testing and questioned costs and internal control related to federal awards are presented in the Compliance Report section of this report.

STATE OF ILLINOIS UNIVERSITY OF ILLINOIS

Notes to Schedule of Expenditures of Federal Awards Year ended June 30, 2010

(1) Scope of Audit Pursuant to OMB Circular A-133

All federal grant operations of the University of Illinois (University) are included in the scope of the audit pursuant to Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Single Audit). The Single Audit was performed in accordance with the provisions of the *OMB Circular A-133 Compliance Supplement*. Testing of all applicable compliance requirements, as described in the Compliance Supplement, was performed in accordance with the guidance provided by the Compliance Supplement. For programs not included in the Compliance Supplement, compliance testing was performed in accordance with the compliance requirements determined by researching the statutes, regulations, and grant agreements governing the individual programs or by researching the *Catalog of Federal Domestic Assistance*. Additionally, some agencies have developed audit guidance for programs not included in the Compliance Supplement. The University's major programs (as determined by the University's auditors) are as follows:

- Research and Development Cluster
- Cooperative Extension Services
- Supplemental Nutrition Assistance Program (SNAP)
- Student Financial Aid Cluster
- State Fiscal Stabilization Fund
- Temporary Assistance for Needy Families
- Child Care Development Funds Cluster
- Maternal and Child Health Services Block Grant to the States
- Homeland Security Cluster

The Department of Education has been designated as the University's cognizant agency for the Single Audit.

(2) Fiscal Period Audited

Single Audit testing procedures were performed for program transactions occurring during the fiscal year ended June 30, 2010, in accordance with OMB Circular A-133.

(3) Basis of Presentation

The accompanying schedule of expenditures of federal awards includes the federal awards activity of the University of Illinois for the year ended June 30, 2010, and is presented on the accrual basis of accounting. The information in this schedule is presented in accordance with the requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of, the basic financial statements.

The schedule designates federal awards as direct and pass-through. Direct awards represent federal funding awarded directly to the University by a federal funding agency. Pass-through awards are federal awards passed through a non-federal entity.

330 (Continued)

STATE OF ILLINOIS UNIVERSITY OF ILLINOIS

Notes to Schedule of Expenditures of Federal Awards Year ended June 30, 2010

(4) Major Programs

In accordance with OMB Circular A-133, major programs of the University are an individual award or a number of awards in a category of federal awards determined to be major using a risk-based approach. The risk-based approach includes consideration of such criteria as current and prior audit experience, oversight by federal agencies and pass-through entities, and the inherent risk of the federal program. Under the risk-based approach, programs are classified as either "Type A" or "Type B." A Type A program is determined pursuant to formulas based on total federal awards expended

(5) Student Loan Programs

As disclosed in the non-cash federal awards sections of the Schedule of Expenditures of Federal Awards, the Federal Direct Student Loans Program (CFDA 84.268) administered by the University awarded approximately \$219.5 million at the Urbana Campus, \$207.9 million at the Chicago Campus, and \$21.5 million at the Springfield Campus.

There were no federal capital contributions received for the year ended June 30, 2010 under the Federal Perkins Loan Program (Perkins), the Health Professions Student Loans Program (HPSL), the Loans to Disadvantaged Students Program (LDS), or the Nursing Student Loans Program (Nursing). The Nurse Faculty Loan Program (NFLP) received \$29,996 in federal capital contributions for the year ended June 30, 2010.

The values of new loans issued to students for the year ended June 30, 2010 were approximately \$4.0 million for Perkins (CFDA 84.038), \$.5 million for HPSL (CFDA 93.342), \$125,000 for LDS (CFDA 93.342), and \$79,667 for NFLP (CFDA 93.264). No new loans were issued to students for the year ended June 30, 2010 for Nursing (CFDA 93.364).

The total loan balances outstanding at June 30, 2010 were approximately \$39.3 million for Perkins, \$7.5 million for HPSL, \$.6 million for LDS, \$.3 million for NFLP, and \$.5 million for Nursing.

STATE OF ILLINOIS UNIVERSITY OF ILLINOIS

Notes to Schedule of Expenditures of Federal Awards Year ended June 30, 2010

(6) Non-cash Federal Assistance

The University of Illinois received a pass-through grant from Illinois Department of Human Services (IDHS) to review the applications of families seeking subsidized day care under the Temporary Assistance for Needy Families, Child Care Development Funds Cluster, and Social Services Block Grant programs. The applications were reviewed according to guidelines set by IDHS, who was the prime recipient of the federal funds. As a result of the University's application review, the State Comptroller distributed \$10,394,963 of federal funds to day care providers as follows:

	CFDA Number	_	Non-Cash Assistance
Temporary Assistance for Needy Families	93.558	\$	5,632,652
Child Care Development Funds Cluster:			
Child Care and Development Block Grant	93.575		1,317,774
Child Care Mandatory and Matching Funds of the			
Child Care and Development Fund	93.596		2,635,784
ARRA Child Care Development Block Grant	93.713		763,013
Social Services Block Grant	93.667	_	45,740
Total non-cash federal assistance		\$_	10,394,963

These federal funds which are paid directly by the State to the providers are considered to be non-cash federal assistance to the University. Although these amounts are not reported on the schedule of expenditures of federal awards, they have been included for purposes of determination of major programs.
